After the publication of the AHA Scientific Statement “Fish Consumption, Fish Oil, Omega-3 Fatty Acids, and Cardiovascular Disease” by Kris-Etherton et al, which appeared in a previous issue of the journal (Circulation. 2002;106:2747–2757), the following errors were noted in Table 3. First, two other sources for the fatty acid composition of fish should have been included.1,2 Secondly, the footnote to “cod liver oil” should have read, “This intake of cod liver oil would provide approximately the Recommended Daily Allowance (RDA) of vitamin A and twice the RDA for vitamin D.” Finally, the EPA+DHA content for four fish was given incorrectly, and should have been as follows:

<table>
<thead>
<tr>
<th>Fish</th>
<th>EPA+DHA Content, g/3-oz Serving Fish (Edible Portion) or g/g Oil</th>
<th>Amount Required to Provide ~1 g of EPA+DHA per Day, oz (Fish) or g (Oil)</th>
