In the article by Czerny et al, “Mortality and Neurologic Injury After Surgical Repair With Hypothermic Circulatory Arrest in Acute and Chronic Proximal Thoracic Aortic Pathology: Effect of Age on Outcome,” which was published in the September 27, 2011 issue of the journal (*Circulation*. 2011;124:1407–1413), a correction is needed. Annotations for two variates in the tables and figures do not match with the correctly made description within the manuscript text. In detail, annotations in Tables 4 through 7 should read: “Age > 60 years” and “HCA > 40 minutes” instead of “Age ≥ 60 years” and “HCA ≥ 40 minutes.” Annotations for age percentiles in Figures 1 and 2 should then read: “≤40, 41–50, 51–60, 61–70, 71–80, ≥81” instead of “<39, 40–49, 50–59, 60–69, 70–79, >80.”

The authors regret the error.

These corrections have been made to the current online version of the article.
