A 76-year-old man with a history of hypertension for which he is taking lisinopril, metoprolol, and diltiazem presents to his primary care physician for a routine physical examination. He reports fatigue and occasional lightheadedness. His physical examination is unremarkable except for a slow pulse, which prompts an ECG.

What is the diagnosis?
To submit your diagnosis, go to http://circ.ahajournals.org/letters/submit/circulationaha;131/25/2232. The diagnosis will follow in next week's issue (July 7).
Please go to the journal’s Facebook page for more ECG Challenges: http://goo.gl/cm4K7. Challenges are posted on Tuesdays and Responses on Wednesdays.
ECG Challenge: June 23/30, 2015
