An 80-year-old woman with a history of hypertension being treated with amlodipine and a β-blocker presents to her primary care physician for a routine physical examination. Her blood pressure is controlled, and her physical examination is unremarkable. Her pulse is noted to be slow, and a 12-lead ECG is obtained.

What is the diagnosis?
To submit your diagnosis, go to http://circ.ahajournals.org/letters/submit/circulationaha;133/13/1296. The diagnosis will follow in the April 5 issue.
Please go to the journal’s Facebook page for more ECG Challenges: http://goo.gl/cm4K7. Challenges are posted on Tuesdays and Responses on Wednesdays.
ECG Challenge: March 29, 2016
