A 45-year-old woman who runs on a regular basis presents to her physician for a routine physical examination. She has no known cardiac disease, but has mild hypertension for which she is taking hydrochlorothiazide. Her pulse is noted to be irregular and a 12 lead ECG is obtained.

What is the diagnosis?
To submit your diagnosis, go to http://circ.ahajournals.org/letters/submit/circulationaha;133/3/341.
The diagnosis will follow in next week’s issue (January 26).
Please go to the journal’s Facebook page for more ECG Challenges: http://goo.gl/cm4K7.
Challenges are posted on Tuesdays and Responses on Wednesdays.
ECG Challenge: January 19, 2016
