ASSOCIATION AWARDS PRESENTED
AT ANNUAL SCIENTIFIC SESSIONS

Among the honors conferred on physicians at the Scientific Sessions in San Francisco by the American Heart Association for outstanding service in advancing the Heart program and for achievement in cardiovascular research were the following:

GOLD HEART AWARDS

Recipients of the Gold Heart Awards, highest award of the Heart Association for outstanding contributions to cardiovascular medicine and the heart organization were E. Cowles Andrus, M.D., past-President of the American Heart Association, and William F. Hamilton, Ph.D., Professor of Physiology, Medical College of Georgia, Augusta.

Dr. Andrus, Associate Professor of Medicine, Johns Hopkins University Medical School, has been an outstanding leader in the activities of the American Heart Association since 1953. He has served several terms on the Association’s Board and Executive Committee and has been chairman of the Executive Committee of the Scientific Council, of the Committee to Review Research Policy, and of the Budget Committee. Dr. Andrus presently serves on the Editorial Board of Circulation.

Dr. Hamilton was cited for his contributions to scientific knowledge of the circulation, including the development of a method for accurate measurement of blood volume, and for his pioneering efforts in the training of young investigators in cardiovascular research techniques. A former member of the Association’s Board and Executive Committee, Dr. Hamilton has served for many years on the various scientific councils and committees of the American and Georgia Associations.

LASKER AWARD

Irvine H. Page, M.D., Director of Research at the Cleveland Clinic, received the Albert Lasker Award of the American Heart Association for distinguished achievement in the field of cardiovascular research and especially for his many contributions to the knowledge of the basic mechanisms of hypertension. Tribute was paid to Dr. Page for his part in the discovery and synthesis of angiotensin, for his isolation of serotonin, and for “his gift of scientific leadership,” which “has left its mark on many other areas of cardiovascular research.”

Dr. Page, who is past-President of the American Heart Association, the Cleveland Area Heart Society, and the American Society for the Study of Arteriosclerosis, was a prime mover in the organization of the Heart Association’s Council for High Blood Pressure Research. He served as the Council’s first Medical Advisory Chairman and is presently a member of its Executive Committee. Also a member of the Board of Directors of the American Heart Association, Dr. Page is the author of many articles and books on hypertension and other aspects of cardiovascular disease. He has also contributed a chapter to “You and Your Heart,” a popular volume on heart disease for the general public.

The Lasker Award, which is given annually by the Albert and Mary Lasker Foundation through the American Heart Association, consists of a statuette of the Winged Victory of Samothrace and an honorarium of $2,500.

AHA AFFILIATES AND CHAPTERS
AID NATIONAL RESEARCH PROGRAM

Affiliates and chapters of the American Heart Association have provided nearly
$93,000 to help underwrite the record total of $3,062,204 awarded for the 1958-59 fiscal year under the Association’s national research support program. The additional support, which helps to reduce a deficit in the national grants-in-aid budget, was in response to urgent requests sent to Heart Associations by Robert D. Wilkins, M.D., AHA President, and A. C. Coreoran, M.D., Chairman of the Association’s Research Committee.

The new sums, all of which are applied to AHA-supported grants and fellowships, are in addition to funds affiliates and chapters regularly assigned to the national research program.

Recipients of AHA grants-in-aid which were supported in full or in part by local Heart Associations were listed in the September issue of Circulation. In addition, the following Associations have provided research funds:

Texas Heart Research Foundation, in full support of the grant-in-aid of Walter S. Henly, Established Investigator at Baylor University College of Medicine, Houston; Stamford-Darien, New Canaan (Conn.) Heart Association, partial support of the grants of Franklin H. Epstein and William L. Glenn at Yale University School of Medicine; Hartford (Conn.) Heart Association, partial support of the grant of Averill A. Liebow, also at Yale; Idaho Heart Association, partial support of the grant of John J. Osborn, Stanford University Hospital, San Francisco; and Delaware Heart Association, in full support of the grant to William S. Blakemore at the University of Pennsylvania School of Medicine.

Funds to be applied by the National Office on an unrestricted basis have also been made available by the Appalachian Area (Tenn.) Heart Committee; Boyd County (Ky.) Heart Association; Connecticut Heart Association; East Tennessee Heart Association; Memphis (Tenn.) Heart Association; Montana Heart Association; Tennessee Heart Association; and West Tennessee Heart Association.

RESEARCH CAREERS TV SERIES
NOW BEING SHOWN ON FILM

Kinescopes selected from the educational television series “Decision for Research,” presented by the American Heart Association and its affiliates and NBC-TV to stimulate the interest of young people in research careers, are now being shown to students and educators by Heart Associations throughout the country.

The filmed programs are designed to acquaint high school and junior college students with the nature of medical and biological research being undertaken by leading cardiovascular investigators who discuss and demonstrate investigations under way in their laboratories. The programs were originally televised as 13 weekly half-hour shows over stations of the Educational Television Network and many NBC-TV stations in cooperation with the Educational Television and Radio Center and the National Broadcasting Company. This series was made possible by a generous grant from E. R. Squibb and Sons, a division of Olin Mathieson Chemical Corporation.

FILMS OF LAY SERIES
ON CARDIOVASCULAR SYSTEM
AVAILABLE TO SPEAKERS

Two new films, “Varicose Veins” and “Circulation of the Blood,” continuing a series on the cardiovascular system and its diseases which may be used as visual aids by physicians when addressing lay groups, are available from local Heart Associations or from the American Heart Association.

“Varicose Veins,” seven minutes long, shows by means of animated diagrams the structure and function of the vein’s valves and how their malfunction may cause varicosity. The script follows closely the text of the booklet Varicose Veins issued by the Association last year for distribution by physicians to their patients.

“Circulation of the Blood,” eight and one-half minutes long, consists of a series of diagrammatic drawings which trace the blood’s circulation and explain how expansion and
contraction of the arteries control its flow.

Both films, which may be used for television or direct audience viewing, were produced for the American Heart Association and its affiliates by Churchill-Wexler Film Productions. Earlier films in the series include "High Blood Pressure," "Strokes" and "Coronary Heart Disease."

HIGH BLOOD PRESSURE RESEARCH COUNCIL MEETING IN CLEVELAND, NOVEMBER 21-22

The Association's Council for High Blood Pressure Research has scheduled its annual conference in Cleveland on Friday, November 21 and Saturday, November 22, 1958.

A tentative program includes discussion of "Chlorothiazide and Altered Vascular Responsiveness," and "Extra-Cellular Fluid and Plasma Volume Changes." Discussion at a business meeting on Friday afternoon will include "Labor Force of a Chicago Utilities Organization," and "The Framingham Project." The Council's Annual Dinner is scheduled for Friday evening.

MEETINGS CALENDAR

November 14-15: First Annual Symposium of Cinefluorography, Rochester, N.Y. George H. Ramsey, Department of Radiology, Strong Memorial Hospital, Rochester 20, N.Y.

January 22-24: American Federation for Clinical Research, Southern Section, New Orleans. Elard M. Yow, Baylor University College of Medicine, Houston 25, Tex.

January 28-29: American Federation for Clinical Research, Western Section, Carmel, Calif. Richard J. Havel, University of California Medical Center, San Francisco 22, Calif.

April 6-9: American Academy of General Practice, San Francisco. Mac F. Cahal, Volker Blvd. at Brookside, Kansas City 12, Mo.

April 15-17: American Surgical Association, San Francisco. W. A. Altmeier, Cincinnati General Hospital, Cincinnati 29, Ohio.

ABROAD

November 30-December 3: Fourth Latin-American Congress of Angiology, Santiago, Chile. Juan Borzone Galvez, Cassila 10256, Santiago, Chile.

CONTRIBUTORS TO THIS ISSUE

FRANK M. BARRY, M.D.
Assistant Clinical Professor of Surgery, Western Reserve University, Assistant Surgeon, University Hospitals of Cleveland, Cleveland, Ohio.

MORTON S. BERK, M.D.
Associate Visiting Physician, Fifth and Sixth Medical Services (Boston University), Boston City Hospital; Instructor in Medicine, Boston University School of Medicine, Boston, Mass.

SIVAJI B. BHONSLE, M.D.
Assistant Attending Surgeon, Presbyterian Hospital; Instructor in Surgery, College of Physicians and Surgeons, Columbia University, New York, N.Y.

RICHARD J. BING, M.D.
Professor of Medicine, Washington University School of Medicine; Director, Washington University Medical Service, V.A. Hospital, St. Louis, Mo.

SAMUEL H. BOYER, M.D.
Fellow of the Johns Hopkins University School of Medicine, Baltimore, Md.

EUGENE BRAUNWALD, M.D.
Chief, Section on Cardiology, Clinic of Surgery, National Heart Institute, Bethesda, Md.

JAMES R. BROWN, Jr., B.S.E.E.
Electronic Scientist, Special Methods Division, Undersens Warfare Laboratory, U.S. Naval Air Development Center, Johnsville, Pa.

HOWARD B. BURCHELL, M.D., PH.D. (MED.)
Consultant, Section of Medicine, Mayo Clinic; Professor of Medicine, Mayo Foundation, Graduate School, University of Minnesota.

FRANK L. CAMPETTI, M.D.
Assistant Professor of Radiology and Research Associate in Medicine, Strong Memorial Hospital, University of Rochester School of Medicine and Dentistry, Rochester, N.Y.

ARTHUR W. CHISHOLM, M.D.
Fellow of the Johns Hopkins University School of Medicine, Baltimore, Md.

MICHAEL A. CORRADO, M.D.
Instructor in Medicine, Georgetown University Medical Center, Washington, D.C.

LAMAR E. CREVASSE, M.D.
Trainee, National Heart Institute, Bethesda, Md.

BERNARD CZERNOBILSKY, M.D.
Assistant Resident in Pathology, Beth Israel Hospital, Boston, Mass.

GEORGE W. DETITZ, M.D.
Assistant Chief, Division of Cardiology, Philadelphia General Hospital, Philadelphia, Pa.

J. J. DENIE, M.D.
Resident in Cardiology, Onze Lieve Vrouwe Gasthuis, Amsterdam, The Netherlands.

RALPH A. DETERLING, JR., M.D.
Associate Professor of Surgery, College of Physicians and Surgeons; Attending Surgeon, Presbyterian Hospital, New York, N.Y.

EPIRAIM DONOSO, M.D.
Research Assistant in Cardiology, The Mount Sinai Hospital, New York, N.Y.

CHARLES T. DOTTER, M.D.
Professor and Head, Department of Radiology, University of Oregon Medical School, Hospitals and Clinics, Portland, Ore.

MAURICE DUNST, M.D.
Fellow of the Dazian Foundation for Medical Research and member of Cardiac Catheterization Team, The Mount Sinai Hospital, New York, N.Y.

JESSE E. EDWARDS, M.D.
Consultant, Section of Pathologic Anatomy, Mayo Clinic; Professor of Pathology, Mayo Foundation, Graduate School, University of Minnesota, Rochester, Minn.

J. L. EHRENHAFT, M.D.
Professor of Surgery, Division of Thoracic and Cardiovascular Surgery, Department of Surgery, State University of Iowa College of Medicine, Iowa.
CONTRIBUTORS TO THIS ISSUE

HIRAM E. ESSEX, Ph.D.
Mayo Foundation for Medical Education and Research, Rochester, Minn.

CHARLES FISCH, M.D.
Visiting Physician and Director, Robert M. Moore Heart Clinic, Indianapolis General Hospital; Assistant Professor of Medicine, Indiana University School of Medicine, Indianapolis, Ind.

AMASA B. FORD, M.D.
Senior Instructor in Medicine, Western Reserve University Medical School; Assistant Physician, University Hospitals of Cleveland, Cleveland, Ohio.

LOUIS H. FRISCH, M.D.
Associate Professor of Radiology, University of Oregon Medical School, Hospitals and Clinics, Portland, Oreg.

DONALD C. FYLER, M.D.
Research Fellow, National Heart Institute, Bethesda, Md.

IRA J. GELB, M.D.
Research Assistant in Cardiology, The Mount Sinai Hospital, New York, N.Y.

JUAN L. GONZALEZ-CERNA, M.D.
Fellowship in Cardiac Surgery from Eli Lilly and Company, Indianapolis, and Syntex S. A., Mexico, D. F.

ALVIN J. GORDON, M.D.
Associate Attending Physician and Head of the Cardiac Catheterization Team, The Mount Sinai Hospital, New York, N.Y.

RAYMOND GRAMIAK, M.D.
Instructor in Radiology, Strong Memorial Hospital, University of Rochester School of Medicine and Dentistry, Rochester, N.Y.

DALE GROOM, M.D.
Assistant Professor of Medicine, Medical College of South Carolina, Charleston, S.C.

HUGH H. HANSON, M.D.
Clinical Assistant Professor of Medicine, Baylor University College of Medicine; Consulting Internist, Southern Pacific Hospital, Houston, Tex.

W. PROCTOR HARVEY, M.D.
Associate Professor of Medicine, Georgetown University School of Medicine; Director, Heart Station, Georgetown University Medical Center, Washington, D.C.

HANS H. HECHT, M.D.
Professor of Medicine, Department of Medicine, University of Utah College of Medicine, Salt Lake City, Utah.

HERMAN K. HELLERSTEIN, M.D.
Assistant Professor of Medicine, Western Reserve University Medical School; Assistant Physician, University Hospitals of Cleveland; Director, The Work Classification Clinic of the Cleveland Area Heart Society, Cleveland, Ohio.

CHARLES E. HOGANCAMP, M.D.
Instructor in Medicine, Washington University School of Medicine; Clinical Career Investigator, V.A. Hospital, St. Louis, Mo.

HERBERT N. HULTGREN, M.D.
Associate Professor of Medicine, Stanford University School of Medicine, San Francisco, Calif.

J. WILLIS HURST, M.D.
Professor of Medicine and Chairman of the Department of Medicine, Emory University, Emory University, Ga.

SCOTT R. INKLEY, M.D.
Assistant Professor of Medicine, Western Reserve University; Assistant Physician, University Hospitals of Cleveland, Cleveland, Ohio.

L. E. JANUARY, M.D.
Professor of Medicine, Department of Internal Medicine, State University of Iowa College of Medicine, Iowa.
CONTRIBUTORS TO THIS ISSUE

MILTON KARDESCH, M.D.
Postdoctoral Research Fellow, U.S. Public Health Service, Department of Medicine, Washington University School of Medicine, St. Louis, Mo.

KERMIT H. KATZ, M.D.
Director, Fifth and Sixth Medical Services (Boston University), Boston City Hospital; Associate Professor of Medicine, Boston University School of Medicine, Boston, Mass.

PAUL A. KIRSCHNER, M.D.
Assistant Attending Surgeon and member of Cardiac Catheterization Team, The Mount Sinai Hospital, New York, N.Y.

RAMON L. LANGE, M.D.
Instructor, Department of Medicine, University of Utah College of Medicine, Salt Lake City, Utah.

THOMAS F. LEO, M.D.
Instructor of Medicine, State University of New York, College of Medicine, Downstate Medical Center, New York, N.Y.

JAMES J. LEONARD, M.D.
Trainee in Cardiology, National Heart Institute, U.S. Public Health Service; Instructor in Medicine, Duke University, Durham, N.C.

DAVID H. LEWIS, M.D.
Chief, Hemodynamics Section, Division of Cardiology, Philadelphia General Hospital, Philadelphia, Pa.

C. WALTON LILLEHEI, M.D.
Professor of Surgery, University of Minnesota, Minneapolis, Minn.

CHI KONG LIU, M.D.
Research Associate and Chief, Laboratory of Catheterization, Division of Cardiology, the Chicago Medical School, Chicago, Ill.

R. BRUCE LOGUE, M.D.
Professor of Medicine, Emory University, Emory University, Ga.

ALDO A. LUISADA
Director, Division of Cardiology and Associate Professor of Medicine, the Chicago Medical School, Chicago, Ill.

JOHN P. MANDANIS, M.D.
Fellow in Medicine (Cardiology), Georgetown University School of Medicine, Washington, D.C.

CHAIM I. MAYMAN, M.D.
Resident Physician, Fifth and Sixth Medical Services (Boston University), Boston City Hospital; Senior Teaching Fellow, Boston University School of Medicine, Boston, Mass.

FABER F. McMULLEN, JR., M.D.
Resident in Internal Medicine, Hermann Hospital; Clinical Instructor in Department of Medicine, Baylor University College of Medicine, Houston, Tex.

ANDREW G. MORROW, M.D., F.A.C.S.
Chief, Clinic of Surgery, National Heart Institute, Bethesda, Md.

HOWARD L. MOSCOVITZ, M.D.
Research Associate in Medicine, The Mount Sinai Hospital, New York, N.Y.

EDMOND A. MURPHY, M.D.
Fellow in Medicine, Johns Hopkins University; Assistant Physician to Outpatients, Johns Hopkins Hospital, Baltimore, Md.

ALEXANDER S. NADAS, M.D.
Assistant Clinical Professor of Pediatrics, Harvard Medical School; Cardiologist, Children's Medical Center, Boston, Mass.

JOSEPH K. PERLOFF, M.D.
Instructor in Medicine, Georgetown University Medical Center, Washington, D.C.

RICHARD B. PERRY, M.D.
Senior Assistant Resident in Medicine, Georgetown University Hospital, Washington, D.C.
CONTRIBUTORS TO THIS ISSUE

GEORGE H. RAMSEY, M.D.
Professor of Radiology and Chairman, Strong Memorial Hospital, University of Rochester School of Medicine and Dentistry, Rochester, N.Y.

ANTHONY S. RIDOLFO, M.D.
Krannert Fellow in Cardiology, Indianapolis General Hospital, Indianapolis, Ind.

WILLIAM M. ROGERS, Ph.D
Assistant Professor of Anatomy, College of Physicians and Surgeons, Columbia University, New York, N.Y.

JOHN C. ROSE, M.D.
Associate Professor of Physiology; Assistant Professor of Medicine, Georgetown University School of Medicine, Washington, D.C.

ABRAHAM M. RUDOLPH, M.D.
Associate in Pediatrics, Harvard Medical School; Associate Cardiologist in charge of Cardiac Catheterization Laboratory, Children’s Medical Center, Boston, Mass. Established Investigator of the American Heart Association.

RICHARD J. SANDERS, M.D.
Senior Assistant Surgeon, Clinic of Surgery, National Heart Institute, Bethesda, Md.

STANLEY J. SARNOFF, M.D.
Chief, Laboratory of Cardiovascular Physiology, National Heart Institute, Bethesda, Md.; Visiting Lecturer, Harvard University School of Public Health, Boston, Mass.

RIKURO SASAKI, M.D.
Research Fellow, Department of Internal Medicine, State University of Iowa College of Medicine, Iowa.

JAMES T. SCOTT, M.B., M.R.C.P.
Fellow in Medicine, Johns Hopkins University; Assistant Physician to Outpatients, Johns Hopkins Hospital, Baltimore, Md.

JACK P. SEGAL, M.D.
Instructor in Medicine, Georgetown University Medical Center, Washington, D.C.

HELMUT SIECKE
Fellow of the Mayo Foundation, Rochester, Minn.

ERWIN SIMANDL, M.D.
Attending Surgeon, Second Surgical Department, University of Vienna Hospital, Vienna, Austria. Fellow, New York Heart Association.

DONALD H. SINGER, M.D.
Assistant Resident in Medicine, Beth Israel Hospital, Boston, Mass.

JOHN STAPLETON, M.D.
Director, Medical Education, St. Vincent Hospital, Worcester, Mass.; Instructor in Medicine, Georgetown University Medical Center, Washington, D.C.

LESTER A. STEINBERG, M.D.
Associate in Medicine, Beth Israel Hospital; Clinical Instructor in Medicine, Tufts Medical School, Boston, Mass.

LEONARD STEINFELD, M.D.
Trainee, New York Heart Association; Research Assistant in Pediatric Cardiology and member of Cardiac Catheterization Team, The Mount Sinai Hospital, New York, N.Y.

E. O. THEILEN, M.D.
Associate Professor of Medicine, Department of Internal Medicine, State University of Iowa College of Medicine, Iowa.

A. P. VERHEUGT, M.D.
Director of Cardiological Department, Onze Lieve Vrouwe Gasthuis, Amsterdam, The Netherlands.

JOHN D. WALLACE, A.B. PHYSICS
Deputy Superintendent for Research and Development, Special Methods Division, Undersea Warfare Laboratory, U.S. Naval Air Development Center, Johnsville, Pa. Associate Physicist, Division of Cardiology, Philadelphia General Hospital, Philadelphia, Pa.

JAMES V. WARREN, M.D.
Professor of Medicine, Department of Medicine, Duke University, Durham, N.C.
CONTRIBUTORS TO THIS ISSUE

JAMES S. WATSON, M.D.
Lecturer in Radiology and Consultant in Medicine, Strong Memorial Hospital, University of Rochester School of Medicine and Dentistry, Rochester, N.Y.

ARNOLD M. WEISSLER, M.D.
American Heart Association Research Fellow, Instructor in Medicine, Department of Medicine, Duke University, Durham, N.C.

WALTER WELKOWITZ, Ph.D.
Consulting Engineer, Gulton Industries, Metuchen, N. J.

A. CALHOUN WITHAM, M.D.
Associate Professor of Medicine, Medical College of Georgia, Augusta, Ga., and member of the American College of Physicians.

MARTIN H. WITTENBORG, M.D.
Assistant Clinical Professor of Radiology, Harvard Medical School; Radiologist, Children's Medical Center, Boston, Mass.

IRVING S. WRIGHT, M.D.
Professor of Clinical Medicine, Cornell University Medical College, New York, N.Y.

CONTENTS
(Continued from back cover)

PQ INTERVAL, PRESSURE DIFFERENCE ACROSS THE MITRAL VALVE AND AMPLITUDE OF THE FIRST SOUND IN DOGS WITH ATRIOVENTRICULAR BLOCK. HelmutSiecke and Hiram E. Essex .................................. 974

GENESIS OF PISTOL-SHOT AND KOROTKOFF SOUNDS. Ramon L. Lange and Hans H. Hecht .......................................................... 975

CORRELATION OF HEART SOUNDS AND MURMURS WITH PRESSURE DURING LEFT HEART CATHETERIZATION. Alvin J. Gordon, Leonard Steinfeld, Maurice Dunst and Paul A. Kirschner .............. 979

INTRACARDIAC PHONOCARDIOGRAPHY: CORRELATION OF MECHANICAL, ACOUSTIC AND ELECTRIC EVENTS OF THE CARDIAC CYCLE. Howard L. Moscovi tz, Ephraim Donoso, Ira J. Gelb and Walter Welkowitz .............. 983

INTRACARDIAC PHONOCARDIOGRAPHY IN MITRAL AND AORTIC VALVE LESIONS. Aldo A. Luisada and C. K. Liu ........................................ 989

INTRACARDIAC PHONOCARDIOGRAPHY: PRESENT STATUS. David H. Lewis, George W. Deitz, John D. Wallace and James R. Brown, Jr. ............ 991

THE PULMONARY VALVE IN DIRECT PHONOCARDIOGRAPHY. William M. Rogers, Erwin Simandl, Shivaji B. Bhonslay and Ralph A. Deterling, Jr. .................. 992

CORRELATION OF HEART SOUNDS WITH EJECTION DYNAMICS OF THE RIGHT VENTRICLE. A. Calhoun Witham ................................ 997

MECHANISMS OF FIXED SPLITTING OF THE SECOND HEART SOUND. Joseph K. Perloff and W. Proctor Harvey ........................................ 998

PHYSIOLOGIC SPLITTING OF THE SECOND HEART SOUND. Samuel H. Boyer and Arthur W. Chisholm ........................................... 1000

THE TRICUSPID COMPONENT OF THE FIRST HEART SOUND IN MITRAL STENOSIS. Herbert N. Hultgren and Thomas F. Leo .................. 1012

CLINICAL ASPECTS OF GALLOP RHYTHM WITH PARTICULAR REFERENCE TO DIASTOLIC GALLOPS. W. Proctor Harvey and John Stapleton ............. 1017

THE AUSTIN FLINT MURMUR: ITS DIFFERENTIATION FROM THE MURMUR OF RHEUMATIC MITRAL STENOSIS. Jack P. Segal, W. Proctor Harvey and Michael A. Corrado ........................................ 1025

AUSCULTATORY FINDINGS IN PERICARDIAL EFFUSION AND IN VENTRICULAR ANEURYSM. W. Proctor Harvey and John P. Mandanis ............... 1034

MAMMARY SOUFFLE OF PREGNANCY: REPORT OF TWO CASES SIMULATING PATENT DUCTUS ARTERIOSUS. James T. Scott and Edmond A. Murphy 1038

THE "NORMAL" SYSTOLIC MURMUR. Dale Groom ................................ 1044

ABSTRACTS .......................................................... 1045

AMERICAN HEART ASSOCIATION ........................................ 1073
