News from the American Heart Association

44 East 23rd Street, New York, New York 10010
Telephone: Gramercy 7-9170

Carleton B. Chapman, M.D.

Carleton B. Chapman, M.D., new President of the American Heart Association, is Professor of Medicine and Director of the Cardiopulmonary Laboratory at the University of Texas Southwestern Medical School in Dallas, a position he has held since 1953. He served on the American Heart Association's Research Committee from 1958-60, and as its Chairman from 1961-62.

He has also served on the Association's Board of Directors and Executive Committee since 1960 and was a Vice President for the 1962-63 term. In addition, he is a member of the Board of the Texas Heart Association and has served on its Scientific Council Committee.

Born in Sycamore, Ala., Dr. Chapman received an A.B. degree from Davidson (N. C.) College. As a Rhodes Scholar at Oxford University, he obtained a B.A. degree in Physiology and, in absentia, an M.A. degree.

Dr. Chapman received his medical degree and a Master of Public Health degree from Harvard University. In 1947, he became associated with the Laboratory of Physiological Hygiene at the University of Minnesota, and in 1950 was appointed Associate Professor of Medicine.

In 1963 Dr. Chapman received a Research Career Award from the National Institutes of Health, while continuing to hold his professorship at the Southwestern Medical School. Dr. Chapman also serves as a staff cardiologist at Parkland Hospital in Dallas and as consultant to the Veterans Administration and the USAF. He is a diplomate of the American Board of Internal Medicine and of its Cardiovascular Disease section. He has held office as Councillor and President of the American Federation for Clinical Research; as Councillor of the Central Society for Clinical Research and of the Southern Society for Clinical Research.

Until recently editor of the American Oxonian, Dr. Chapman is associate editor of the Archives of Internal Medicine and has served on the editorial board of the Journal of Clinical Investigation.

Dr. Chapman's research interests have centered on the physiology of human exercise, the mechanics of cardiac function, and clinical topics. He has also pursued continuing interests in the history of science and in the development of further understanding between the modern scientist and humanist. From May to October 1964, he worked in Great Britain on a Guggenheim Fellowship in the field of exercise physiology.
New President-Elect, Officers
Named at Annual Meeting

Helen B. Taussig, M.D., Baltimore, Professor Emeritus of Pediatrics at Johns Hopkins University and co-developer of the first "blue baby" operation to relieve tetralogy of Fallot, was named President-elect of the American Heart Association at its Annual Meeting in Atlantic City. Carleton B. Chapman, M.D., Dallas, was installed as President for the 1964-65 term.

Retiring President John J. Sampson, M.D., San Francisco, Clinical Professor of Medicine, University of California School of Medicine and Senior Physician at Mount Zion Hospital, became Chairman of the Association's Central Committee for Medical and Community Program.

Newly elected Vice Presidents are Wright R. Adams, M.D., Chicago; R. Bruce Logue, M.D., Atlanta, and H. Willis Nichols, Cincinnati. Re-elected Vice Presidents are Katharine D. Brownell, M.D., New York; Walter B. Frommeyer, Jr., M.D., Birmingham; Lewis E. January, M.D., Iowa City, Iowa; Jerome G. Kaufman, M.D., Maplewood, N. J.; John R. Mage, Los Angeles and Clarence B. Randall, Chicago.

Three-Day Cardiology Course
Scheduled for Detroit in Jan.

"Recognition of Coronary Artery Disease" has been chosen as the subject for the postgraduate course, "Three Days of Cardiology," to be held in Detroit on January 21-23, 1965.

The course, sponsored jointly by the AHA Council on Clinical Cardiology, Michigan Heart Association and Wayne State University College of Medicine, will be directed by Richard J. Bing, M.D.

A three-day cardiology course is also scheduled in 1965 for May 20-22 in Birmingham, sponsored by the Council, the Alabama Heart Association and the Medical College of Alabama. It will be directed by Drs. Tinsley R. Harrison and T. Joseph Reeves. Another is scheduled for September 15-17 in St. Paul, sponsored by the Council, the Minnesota Heart Association and Charles T. Miller Hospital. It will be directed by Dr. Jesse E. Edwards.

Fees for each course are $50 for Fellows and Members of the Council on Clinical Cardiology and $75 for others. Additional information may be obtained from the Director of Medical Education at the American Heart Association.

Renew Subscriptions Now
For AHA Scientific Journals

Subscriptions to Circulation and Circulation Research may now be renewed for 1965 through the Subscription Department, American Heart Association, 44 East 23rd Street, New York 10010. Subscription rates are $14 yearly for each publication ($15 foreign). A combined subscription to both journals is $25 annually ($28 foreign).

Reduced subscription rates of $7.50 for each journal may be obtained by medical students, interns, residents and research fellows in the U. S. who submit a statement of occupation.

A subscription to either of the journals is included in the $25 annual dues for Fellows in the Association's Council on Clinical Cardiology.

Medical Education Research
Applications Being Accepted

Applications for the post of Fellow in Medical Education are now being accepted by the American Heart Association for the 1965-66 fiscal year. This Fellowship is part of the Association's program to stimulate full-time careers in medical education. The Fellow will be trained to analyze learning processes and will study modern teaching methods in pre-clinical and clinical fields. The award also offers qualified physicians an opportunity to become acquainted with behavioral psychology.

The successful applicant will receive training in a medical school's Department of Research in Medical Education and participate in pilot projects in continuing education conducted by the American Heart Association. With this training, the candidate will be prepared for a career in the field of research in medical education. He will be able to design
and evaluate projects in undergraduate and postgraduate medical education.

An applicant must hold either an M.D., Ph.D., Sc.D., or its equivalent. He must be a citizen of the U. S. or Canada, or show evidence that he intends to take out such citizenship.

To meet the needs of candidates with varied backgrounds and experience, the stipend will be determined by the applicant’s qualifications. It will, however, be at least on the senior post-doctoral level.

Requests for information should be sent to the Director of Medical Education, American Heart Association, 44 East 23rd Street, New York, N. Y., 10010. The deadline for applications has been set at January 1, 1965.

Book on Blood Flow
Published by AHA

"Autoregulation of Blood Flow," the proceedings of an international symposium supported by the Heart Association’s Councils on Basic Science and Circulation has been published by the Association as No. 8 in its Monograph Series. The symposium was held at the University Medical Center, Indianapolis, June, 1963.

The 292-page paper-bound book, edited by Paul C. Johnson, Ph.D., reviews the current status of knowledge in the field. Included are a discussion of how organs like the heart maintain a constant blood flow despite input changes from the arteries, a problem under study in numerous laboratories.

Copies of the volume are available at $3 each from local Heart Associations or the AHA national office.

Heart Affiliates Contribute
To Aid National Research

A total of $161,827 has been pledged by affiliates and chapters of the American Heart Association in supplementary support of national research projects for the 1964-65 fiscal period. Of this amount $139,716 was received through September. In addition to those previously reported, sums were received as follows:

Connecticut Heart Association’s Northwest Chapter and chapters in Eastern Windham, New London, Norwalk, Norwich and Stamford-Darien-New Canaan, a total of $20,000 to help support grants to Robert P. Noble at Sharon Research Institute, and M. Jay Goodkind, Allan V. N. Goodyer and Levin L. Waters at Yale University;

San Francisco Heart Association, $6,380 for a grant to Shizuo Watanabe at the University of California Medical Center;

Puerto Rico Heart Association, $1,000 to aid a grant to Pura N. Suarez-Roldan at the University of Puerto Rico;

Washington State Heart Association, $14,961 to help support grants to Robert L. Van Citters and Peter O. Ways at the University of Washington.

New Volume is Published
In Hypertension Series

A new volume of special interest to the practicing physician has been published by the Heart Association in its series on hypertension. Entitled "Hypertension-Blood Pressure and Toxemia of Pregnancy," it consists of the proceedings of the 1963 meeting of the AHA Council for High Blood Pressure Research and is reprinted from a supplement to the August, 1964, issue of Circulation.

The volume, containing 14 articles devoted to clinical problems, was edited by Simon Rodbard, M.D. It is available at $2.50 a copy. Earlier volumes in the series may be obtained at $7 for a set of five. These are "Hypertension" (Vol. V); "Hypertension-Drug Action, Epidemiology and Hemodynamics" (Vol. VII); "Hypertension-Chemical and Hormonal Factors" (Vol. IX); "Hypertension-Neural and Renal Mechanisms" (Vol. X); and "Hypertension-Vasoactive Mechanisms" (Vol. XI).

All may be ordered from local Heart Associations or the AHA national office.

Meetings Calendar

January 21-23: 3 Days of Cardiology (Recognition of Coronary Artery Disease), Detroit. Dr. F. J. Lewy, American Heart Association, 44 E. 23rd St., New York 10010.

January 25-27: American College of Surgeons
(Sectional Meeting), Atlanta. Dr. S. P. Harbison, 55 E. Erie, Chicago 60611.
February 15-17: American College of Surgeons (Sectional Meeting), Philadelphia. Dr. S. P. Harbison, 55 E. Erie, Chicago 60611.
February 17-21: American College of Cardiology, Boston. Dr. Philip Reichert, 350 Fifth Avenue, New York 10001.
March 8-11: American College of Surgeons (Sectional Meeting), Seattle. Dr. S. P. Harbison, 55 E. Erie, Chicago 60611.
April 9-10: American Society for Artificial Internal Organs, Atlantic City. Dr. B. K. Kusserow, University of Vermont College of Medicine, Burlington.
April 9-15: American Academy of General Practice, San Francisco. Mac F. Cahal, Volker at Brookside, Kansas City 12, Mo.
April 10-14: Federation of American Societies for Experimental Biology, Atlantic City. Dr. Milton O. Lee, 9650 Wisconsin, Washington 14, D. C.
April 25-29: International College of Surgeons (North American Federation), Las Vegas, Nev. Dr. Walter F. James, 1516 Lake Shore Drive, Chicago, 60610.
May 2-5: American Society for Clinical Investigation, Atlantic City. Dr. G. W. Liddle, Vanderbilt University Medical School, Nashville 5, Tenn.
May 4-5: Association of American Physicians, Atlantic City. Dr. Eugene A. Stead, Jr., Duke Hospital, Durham, N. C.
June 27-29: International Congress on Smoking and Health (First), New York. W. A. Scharffenberg, 6830 Laurel St., N. W., Washington 12, D. C.
August 9-12: National Medical Association, Chicago. Dr. John T. Givens, 1108 Church St., Norfolk 10, Va.
August 30-September 2: American Hospital Association, San Francisco. Dr. Edwin L. Crosby, 840 N. Lake Shore Drive, Chicago 60611.
September 15-17: 3 Days of Cardiology (Functional Pathology of the Cardiovascular System), St. Paul. Dr. F. J. Lewy, American Heart Association, 44 East 23rd Street, New York 10010.
September 28-October 1: American Roentgen Ray Society, Washington, D. C. Dr. C. Allen Good, Mayo Clinic, Rochester, Minn.
September 29-October 1: American Association of Medical Clinics, Washington, D. C. Dr. R. S. Condie, 300 Homer Ave., Palo Alto, Calif.

Abroad
April 12-14: World Congress on Ballistocardiography and CV Dynamics (First), Amsterdam. Dr. A. A. Knoop, Valeriusplein 11, Amsterdam, Holland.
CONTRIBUTORS TO THIS ISSUE

Walter H. Abelmann, M.D.
Assistant Professor of Medicine, Harvard Medical School; Assistant Physician, Thorndike Memorial Laboratory and the Second and Fourth (Harvard) Medical Services, Boston City Hospital, Boston, Massachusetts.

Kurt Amplatz, M.D.
Associate Professor of Radiology, University of Minnesota, Minneapolis, Minnesota.

Giorgio Baroldi, M.D.
National Institutes of Health, Visiting Scientist, Armed Forces Institute of Pathology, Washington, D. C.

Hu A. Blake, Col., MC, USA
Thoracic-Cardiiovascular Surgery Service, Brooke General Hospital, Fort Sam Houston, Texas.

Albert N. Brest, M.D.
Associate Professor of Medicine and Head, Section of Vascular Diseases and Renology, Hahmemann Medical College and Hospital, Philadelphia, Pennsylvania.

M. J. Browne, M.D.
Assistant Professor of Pediatrics, Department of Pediatrics, Yale University School of Medicine, Grace-New Haven Community Hospital, New Haven, Connecticut.

Oscar Creech, Jr., M.D.
Henderson Professor of Surgery, Tulane University School of Medicine, New Orleans, Louisiana.

George D. Davis, M.D., M.S. (Radiology)
Consultant, Section of Roentgenology, Mayo Clinic; Instructor in Radiology, Mayo Foundation, Graduate School, University of Minnesota, Rochester, Minnesota.

George L. Donnelly, M.D., M.R.C.P.
Research Fellow of the National Heart Foundation of Australia, Member of the Unit of Clinical Investigation, Royal North Shore Hospital, Sydney, Australia.

Harold W. Draper, M.D.
Research Fellow, Cardiovascular Research Laboratory, Department of Medicine, Georgetown University School of Medicine, Washington, D.C.

Jesse E. Edwards, M.D.
Director of Laboratories, The Charles T. Miller Hospital, St. Paul; Clinical Professor of Pathology, School of Medicine and Professor of Pathology, Graduate School, University of Minnesota, Minneapolis, Minnesota.

John F. Fairbairn II, M.D.
Consultant, Section of Medicine, Mayo Clinic; Assistant Professor of Medicine, Mayo Foundation, Graduate School, University of Minnesota, Rochester, Minnesota.

Arnold Greensher, M.D.
Research Fellow Division of Angiology, Department of Medicine, University of Basle, Switzerland.

Edward Henry, M.D.
Staff Physician, The Long Island Jewish Hospital, New Hyde Park; Assistant Attending Physician, North Shore Hospital, Manhasset, New York.

Allen T. Hinman, M.D.
Associate Clinical Professor of Medicine; Consulting Member of the Staff, Cardiovascular Research Institute, University of California School of Medicine, San Francisco, California.

Irwin Hoffman, M.D.
Staff Physician, The Long Island Jewish Hospital, New Hyde Park; Associate Attending Physician, St. Joseph's Hospital, Far Rockaway, New York.

Michael Hume, M.D.
Assistant Professor of Surgery, Department of Surgery, Yale University School of Medicine, Grace-New Haven Community Hospital, New Haven, Connecticut.

Allen T. Hinman, M.D.
Associate Professor of Clinical Medicine, Tulane University School of Medicine, New Orleans, Louisiana.

Herbert K. Kain, M.D.
Research Fellow in Medicine, University of California School of Medicine, San Francisco, California; Post-doctoral Fellow, National Heart Institute, U. S. Public Health Service (1962-1963); Junior Research Fellow, San Francisco Heart Association (1961-1962).

Vladimir I. Kanjuh, M.D.
Assistant Professor of Pathology, Institute of Pathology, Medical Faculty of Belgrade (on leave of absence). Formerly, International Postdoctoral Research Fellow (FFG-329), U. S. Public Health Service. Presently, Research Associate (Cardiovascular Pathology), The Charles T. Miller Hospital, St. Paul, Minnesota.

William Bill Kannel, M.D.
Associate Director, Heart Disease Epidemiology Study, Framingham, Massachusetts; and the National Heart Institute, National Institutes of Health, U. S. Public Health Service, Washington, D. C.

Chiuchi Kawai, M.D.
Formerly Fulbright Research Scholar and Research Fellow, Thorndike Memorial Laboratory, Boston City Hospital and The Department of Medicine, Harvard Medical School, Boston, Mass. Present Address: Third Medical Clinic, Kyoto University Hospital, Sakyo-ku, Kyoto, Japan.

Philip G. Keates, M.D., M.R.C.P.

Bruce A. Kottke, M.R.C.P.
Consultant, Section of Medicine, Mayo Clinic; Instructor in Medicine, Mayo Foundation, Graduate School, University of Minnesota, Rochester, Minnesota.

David Littmann, M.D.
Chief, Cardiology Service, Veterans Administration

Circulation, Volume XXX, December 1964
CONTRIBUTORS

Hubert V. Pipherger, M.D.
Chief, VA Research Center for Cardiovascular Data Processing, Veterans Administration Hospital; Assistant Professor of Medicine, Georgetown University School of Medicine, Washington, D. C.

Nathan Poker, M.D.
Assistant Professor of Radiology, Cornell University Medical College; Associate Attending Radiologist, The New York Hospital, New York, New York.

H. F. Polesky, M.D.
U. S. Public Health Service Trainee in Clinical Pathology, Department of Pathology, Yale University School of Medicine, Grace-New Haven Community Hospital, New Haven, Connecticut.

Osvaldo Ramirez, M.D.
Instructor in Medicine, Section of Vascular Disease and Renology, Hahnemann Medical College and Hospital, Philadelphia, Pennsylvania.

Keith Reemtsma, M.D.
Associate Professor of Surgery, Tulane University School of Medicine, New Orleans, Louisiana.

L. Reiner, M.D.
Visiting Associate Professor of Pathology, Albert Einstein College of Medicine; Pathologist and Director of Laboratories, The Bronx-Lebanon Hospital Center (Fulton Division), New York, New York.

Albert L. Rubin, M.D.
Associate Professor of Medicine, Cornell University Medical College, New York, New York.

S. K. Sanyal, M.B.
Department of Pediatrics, Yale University School of Medicine, Grace-New Haven Community Hospital, New Haven, Connecticut. Abel Halbrook Research Fellow in Pediatric Cardiology, New Haven Heart Association.

Maurice Sokolow, M.D.
Professor of Medicine; Chief of Cardiovascular Division, Department of Medicine; Member of the Staff, Cardiovascular Research Institute, University of California School of Medicine, San Francisco, California.

Friedemann W. Stallmann, Sc.D.
Chief, Mathematics Section, Veterans Administration Hospital, Washington, D. C.

Israel Steinberg, M.D.
Clinical Associate Professor, Medicine and Radiology, Cornell University Medical College; Associate Attending Physician, The New York Hospital, New York, New York.

Kurt H. Stenzel, M.D.
Research Fellow in Medicine, Cornell University Medical College, New York, New York. Fellow of the New York Heart Association.

James E. Stevenson, M.D.
Resident in Pathology and Trainee in Cardiovascular Pathology, Charles T. Miller Hospital, St. Paul; Graduate Student, University of Minnesota, Minneapolis, Minnesota.
Robert C. Taymor, M.D.
Staff Physician, The Long Island Jewish Hospital, New Hyde Park; Associate Attending Physician, St. Joseph's Hospital, Far Rockaway, New York.

Russell Vandenberg, M.B., M.R.A.C.P.
Roche Research Fellow in Cardio-pulmonary disease of the Royal Australasian College of Physicians. Member of the Unit of Clinical Investigation, Royal North Shore Hospital, Sydney, Australia.

David A. Watson, M.B., F.R.C.S.

William Whitaker, M.D., B.Sc., F.R.C.P.

Leo Karl Widmer, M.D., Ph.D.
Head, Division of Angiology, Department of Medicine, University of Basle, Switzerland.

L. Wolff, M.D.
Clinical Professor of Medicine, Harvard Medical School and Head of Cardiographic Laboratories, Beth Israel Hospital, Boston, Massachusetts.

R. Wolff, M.D.
Clinical Associate in Medicine, Harvard Medical School; Assistant Visiting Physician, Beth Israel Hospital, Boston, Massachusetts.

aorta, spontaneous dissecting hematoma of, 230

Acetylstrophanthidin and adrenergic stimulation, antagonistic effects on sinus node of, 308

Acidosis, metabolic, management of cardiac arrest with special reference to, 785

Actin from heart muscle: studies on amine acid composition, 307

Adrenergic stimulation, antagonistic effects on sinus node of acetylstrophanthidin and, 308

Age
changes in levels of serum cholesterol and beta lipoprotein according to, 794
electrocardiographic findings in healthy old men compared with young men, 145
microscopical appearances of human peripheral arteries during growth and aging, 303
old, heart disease in, 302
relationship between aortic plaques and, 786
serum β-lipoprotein lipids and proteins in elderly male survivors of myocardial infarction, 142
and sex, blood pressure of adults by, 951

Agenesis, anomalous right pulmonary venous drainage with partial pulmonary hypoplasia or, 631

Aldosterone
excretion in essential hypertension, 949
primary aldosteronism with malignant hypertension, 474

Allantoic fluid, congenital heart disease and other malformations produced by influenza A virus and, in chick embryo, 464

Amino acid, studies on composition of, 307

Anastomosis
anastomotic enlargement and ischemic myocardial damage, 794
arterial
in coronary circulation: anatomical features demonstrated by stereoarteriography, 466
in coronary circulation: distribution, enumeration, and measurement, 793
intercoronary, augmentation by vascular drug, 794
of superior vena cava to right pulmonary artery, cardiopulmonary dynamics of, 47

Anemia
chronic, severe, refractory, late cardiac complications of, plus hemochromatosis, 696
electrocardiographic modifications in, 945
postoperative hemolytic in endocardial cushion defects, 801
spontaneous partial remission of, in case with ostium primum defect, 800

Anesthesia
angiotensin to correct hypotension during, 622
for atrial defibrillation, 303
pheochromocytoma: anesthetic considerations, 631
pronethalol in treatment of ventricular arrhythmias during, 785

Aneurysm(s)
abdominal, surgically treated, 631
aneurysmal dilatation of aortic sinuses in coarctation of aorta, 227
congenital, of membranous portion of ventricular septum, 223
dissecting, aortic mucopolysaccharides and metachromasia in, 621
electrokymographic findings in, 946
formation in children, giant-cell arteritis with, 149
hemorrhage from, prognostic value of carotid stenosis seen in angiogram in, 629
left ventricular, surgical treatment, 632
of membranous septum plus interventricular septal defect producing right ventricular outflow obstruction, 429
of right ventricle caused by selective angiography, 902
sinus of Valsalva, Ehlers-Danlos syndrome with, and aortic insufficiency simulating rheumatic heart disease, 148
spontaneous dissecting hematoma of abdominal aorta in Leriche syndrome, 230

Angina pectoris
 cerebrovascular complications in nitroglycerine treatment of, 143
electrokymographic findings in, 946

Angiography
in diagnosis of endocardial cushion defects, 628
of left heart after transeptal puncture of left atrium, 628
left ventricular, transient myocardial damage secondary to extravasation of contrast material during, 897
selective, causing aneurysm of right ventricle, 902

Angiogram, prognostic value of carotid stenosis as seen in, 629

Angiotensin
as adjunctive agent to correct hypotension during anesthesia, 632
in blood and lymph following reduction in renal arterial perfusion pressure in dogs, 312
and renal vascular damage, 949

Angiotensin II, effect on blood pressure in hypertensive disease of, 950

Animals
cats, inhibition of tonic cardiac sympathetic activity by stimulation of brain septal region in, 625
dogs
angiotensin in blood and lymph after reduction in renal arterial perfusion pressure in, 312

Circulation, Volume XXX, December 1964
963
cardiac lymph: flow rates and composition in, 625
with chronic impairment of cardiac lymph flow, susceptibility to staphylococcal valvular endocarditis, 417
with constricted pulmonary artery, cardiac performance during exercise, 310
determinants of stroke work in heart-lung preparation of, 625
effect of acute hypercalcemia on heart of intact, 952
effect of calcium on duration of Q-T interval and ventricular systole in, 311
effect of endecapetide eledoisin on coronary blood flow in, 305
effect of heart extract on coronary blood flow and myocardial oxygen consumption in, 624
electrocardiographic patterns after interruption of main and peripheral branches of canine left bundle of His, 473
electrocardiographic study of bundle-branch block in, 944
heart in situ, potassium exchange in, 307
intrarenal distribution of nutrient blood flow determined with Krypton41 in unanesthetized, 311
normotensive and renal hypertensive chronic spinal in, 949
thrombolysin to dissolve blood clot in pleural space of, 463
electrocardiographic study of bundle-branch block in, 944
ventricular dysrhythmia associated with atrial fibrillation in, 784
frog
heart, movements of Ca in beating ventricles of, 309
heart ventricles at rest and during contractures, movements of Ca in, 309

generic aspects of cardiovascular diseases in, 114
hypotensive activity of nortropine and norpseudo-tropine-substituted phenothiazines in hypertensive and normotensive, 301
rabbit(s)
antianghrogenic effect of iridium192 on cholesterol-fed rabbit, 462
distribution of lipids and enzymes in aortic wall in dietary atheroma in, 137
injury of wall of carotid artery: long-term effects on normal and hyperlipaemic, 137
removal of various lipoproteins from double-ligated segments of artery and vein in, 138
role of aortic and vagus nerves in arterial baroreflex bradycardia in, 305
rat
aortas, malformations from low dosage fetal lathyism, 792
aortic depressor fibers in, 308
effect of potassium deficiency on action of chlorothiazine in, 304
electromagnetic determination of carotid blood flow in, 473
heart, metabolism of palmitic acid in perfused, 306

heart-lung preparation: observations in altered cardiac function in prenecrotic phase of adrenal-regeneration hypertension with, 146
metabolism and damage of aortic wall in aortic sclerosis of, 620
pressor activity of renal venous effluent of normal and hypertensive, 301

Anion exchange resin, in treatment of familial hypercholesterolemia, 462

Antiatherogenic effect of iridium192 on cholesterol-fed rabbit, 462

Anticoagulant(s)
in acute myocardial infarction, 142
and coronary artery disease, 444
oral, evidence against “rebound” thrombosis after stopping, 141
prophylaxis and systemic embolism in rheumatic heart disease, 789
therapy
intramural, small bowel bleeding in, 788
long term, 140
long term, cerebral vascular disease in relation to, 789
oral, in acute myocardial infarction, heparin plus, 468
in thromboembolic disease of brain, 788

Aorta
abdominal, spontaneous dissecting hematoma in Leriche syndrome, 230
atherosclerosis, lipid-binding capacity of internal globulins in, 694
cocartation of, aneurysmal dilatation of aortic sinuses in, 227
depressor fibers in rat, 308
histochemical studies: comparison of aortic and cerebral atherogenesis, 143
middle, syndrome, 633
mitral insufficiency, “pseudo-stenosis” syndrome of, 634
mucopolysaccharides and metachromasia in dissecting aneurysm of, 621
plaque(s), relationship to age, sex, and blood pressure, 786
and pulmonary trunk, corrected transposition of, 790
rat, malformations from low dosage fetal lathyism, 792
sclerosis. See Sclerosis, aortic.
stenosis. See Stenosis, aortic

Aortic arch
atresia of, 749
rare anomaly of, with thoracic loop formation, 790

Aortic nerve and vagus nerves in arterial baroreflex bradycardia in rabbits, 305

Aortic valve
closure, direct detection timing of, 946
disease, and diagnostic value of derivatives of arterial pressure pulse, 90
replacement, total, 314
stenosis, laterality of carotid murmur in, 623

Aortic wall damage in aortic sclerosis of rat, 620

Aortography, complications of, 843

Arrest, cardiac
emergency treatment of, 150
and hypothermia, response of myocardial fine structure to, 302
management of, 785
reversibility of morphologic changes after elective, 953

Arrhythmias
atrial, paroxysmal ventricular fibrillation during treatment of, 17
cardiac, prevention and treatment in hypothermia, 637
complex, identifying P waves in, 947
in post-operative period, 313

Circulation, Volume XXX, December 1964
Arteriosclerosis
obliterans, thromboangiitis obliterans and, 148
obstruction, transluminal treatment of, 654
Arteriovenous fistulas, indicator-dilution curves in systemic, 472
Arteritis, giant-cell, with aneurysm formation in children, 149
Ascorbic acid, effect on experimental atherosclerosis of, 787
Atherogenesis
human coronary, histochemical studies: comparison with aortic and cerebral, 143
and plasma constituents, 620
Atherogenic indices, review and evaluation of, 787
Atheromatous embolism, 611
Atherosclerosis
antithrombin and antifibrinolytic activity of blood in patients with, 787
aortic, lipid-binding capacity of intimal globulin in, 694
cholesterol granuloma modification by phospholipid in, 137
coronary, graphic pathology of, 622
distribution of lipids and enzymes in aortic wall in dietary rabbit atheroma and human, 137
experimental, effect of ascorbic acid on, 787
ATPase, localization in cardiac muscle of G-strophanthin sensitive, 303

Arteriography
anastomoses
in coronary circulation: demonstrated by stereoarteriography, 466
in coronary circulation: distribution, enumeration, and measurement, 793
blood pressure of, measurement with portable recorder, 882
oxygen saturation of, in Fallot’s tetralogy, 501
peripheral microscopical appearances in growth and aging of, 803
occlusion, 836
pressure of, influence on antihypertensive normal kidney action, 351
pressure pulse of, diagnostic value in aortic valve disease and hypertrophic subaortic stenosis, 90
pulse waves of, transducers for external recording of, 470
removal of lipoproteins from doubly-ligated segments of, in rabbit, 138
and veins, cardiac diagnosis from examination of, 272
walls during experimental hypertension, sodium increase in, 949
See also specific artery and/or condition
Arteriography
of cerebrovascular occlusive disease, 630
coronary
evaluation of “coronary vasodilators,” 468
in patients with cardiac anomalies, significance of distribution type and adaptation of coronary arteries in, 629
Arteriosclerosis
obliterans, thromboangiitis obliterans and, 148
obstruction, transluminal treatment of, 654
Arteriovenous fistulas, indicator-dilution curves in systemic, 472
Arteritis, giant-cell, with aneurysm formation in children, 149
Ascorbic acid, effect on experimental atherosclerosis of, 787
Atherogenesis
human coronary, histochemical studies: comparison with aortic and cerebral, 143
and plasma constituents, 620
Atherogenic indices, review and evaluation of, 787
Atheromatous embolism, 611
Atherosclerosis
antithrombin and antifibrinolytic activity of blood in patients with, 787
aortic, lipid-binding capacity of intimal globulin in, 694
cholesterol granuloma modification by phospholipid in, 137
coronary, graphic pathology of, 622
distribution of lipids and enzymes in aortic wall in dietary rabbit atheroma and human, 137
experimental, effect of ascorbic acid on, 787
ATPase, localization in cardiac muscle of G-strophanthin sensitive, 303

Arteria
of aortic arch, 749
pulmonary, congenitally unguarded tricuspid orifice and coexistent, 911
Atrioventricular block. See Heart block.
Atrioventricular canal, signs of left ventricular underdevelopment in child with complete type of persistent common, 755
Atrioventricular conduction system
functional properties of, 307

Renal artery
hypertension, vasopressor material in, 474
perfusion pressure in dogs, angiotensin in blood and lymph following reduction in, 312
physiology, 1
reconstruction for hypertension, 951
renal vascular damage, angiotensin and, 949

Renal disease
methyldopa for hypertension from chronic, 950
occult primary, in hypertensive patient, 619

Reserpine and hydrochlorothiazide compared with methyldopa and hydrochlorothiazide in hypertension, 146

Retina
atheromatous embolism of, 635
capillary shunts in pathogenesis of diabetic retinopathy, 634

Rheumatic heart disease
dextorotation of heart in rheumatic mitral stenosis, 907
Ehlers-Danlos syndrome with sinus of Valsalva aneurysm and aortic insufficiency simulating, 148
systemic embolism and anticoagulant prophylaxis in, 789

Rheumatism, changing face of 312

Ribs, cervical, cerebral and peripheral emboli caused by, 141

Right axis deviation and signs of left ventricular underdevelopment, 755

Rubidium86, myocardial, relationship of blood flow to clearance in right and left ventricles of, 308

Radioisotopes
antiatherogenic effect of iridium192 on cholesterol-fed rabbit, 462
in heart scanning, detection of pericardial effusion by, 948
intrarenal distribution of nutrient blood flow determined with krypton85 in unanesthetized dog, 311

krypton and xenon in measurement of muscle blood flow, 27
radioactive tracer 1125 for obtaining indicator dilution curves, 945
relationship of blood flow to myocardial Rb86 clearance in right and left ventricles, 308

S

Sclerosis, aortic, correlation between intensity of metabolism and damage of aortic wall in experiments in rat, 620

Septal defects
interventricular, producing right ventricular outflow obstruction, 429
ventricular, in childhood lesions with predominant arteriovenous shunts, 464

Septum
intact interventricular, double-outlet right ventricle with, 745
ventricular, congenital aneurysm of membranous portion of, 223

Serotonin
and emboli, behavior of pulmonary hypertension produced by, 312
Raynaud’s disease, Raynaud’s phenomenon and, 149

Serum
alpha-hydroxybutyrate dehydrogenase: new test for myocardial infarction, 468
cholesterol levels
after myocardial infarction, 143
changes according to age, sex, and existence of coronary heart disease, 794
creatine phosphokinase in myocardial infarction diagnosis, 469
a-hydroxybutyrate dehydrogenase in myocardial infarction, 794
β-lipoprotein lipids and protein in elderly male survivors of myocardial infarction, 142
and plasma-induced thrombosis, role of factors in, 788
thrombotic accelerator activity, activation product factor IX, and serum-induced thrombosis, 788

Sex
blood pressure of adults by age and, 951
changes in levels of serum cholesterol and beta lipoprotein according to age and, 794
relationship between aortic plaques and age, blood pressure and, 786

Shock, blood volume vs. central venous pressure in, 625

Shunt(s)
arteriovenous, ventricular septal defects in childhood lesions with predominant, 464
capillary, in pathogenesis of diabetic retinopathy, 634
left-to-right, kymographic recognition of independent pulmonary arterial movement in, 630
syndrome, palliative, in acute cor pulmonale due to massive pulmonary embolism, 769

Sinus(es)
anerysmal dilatation of aortic, in coarctation of aorta, 227
node, antagonistic effects of acetylsalicylacid and adrenergic stimulation in, 308
rhythm, normal, study of right atrial pressure pulse in functional tricuspid regurgitation and, 190

Sinus inversus
levocardia with, 923
mode of inheritance in, 465

Skin
ischaemic ulceration of, low molecular-weight dextran in, 787
temperature, effects of angiotensin II infusion on, 626

Sleep, blood pressure changes during human, 619

Smoking. See Cigarette smoking

Sodium
in arterial walls, increase during experimental hypertension, 949
effect on duration of Q-T interval and ventricular systole in dog, 311
high Na content of early embryonic chick heart, 308
Sodium amobarbital, hemodynamic effects in hypertension of, 952
Spiroloctone, diuretic effect in cardiac and hepatogenic oedema of, 466
Splenoportography and portal vein thrombosis in cirrhosis of liver, 628
Staphylococcal endocarditis
pulmonic regurgitation following, 411
valvular, susceptibility of dogs with chronic impairment of cardiac lymph flow, 417
Starling’s law of heart, studies on, 719

Stenosis
aortic
phonocardiogram accuracy in assessing severity of, 35
or pulmonic, hemodynamic and vectorcardiographic data in patients with, 511
valvular, laterality of carotid murmur in, 623
carotid, in hemorrhage from aneurysm, 629
infundibular, of right ventricle, 465
mitral
Frank vectorcardiogram in, 865
funs in, 633
studies on “P sinistocardiale” pattern and atrial fibrillation in, 942
“pseudo-, of aorta-mitral insufficiency,” 634
pulmonic, fate of patient with, 554
rheumatic mitral, dextroversion of heart in, 907
subaortic, first and second derivatives of arterial pressure pulse in diagnosis of, 90

Stereoarteriography, anatomic features of arterial anastomoses in coronary circulation demonstrated by, 466

Stokes-Adams disease, long-term electrical stimulation of heart in, 150

Stress, coronary heart disease and, 942

Stroke work determinants in dog heart-lung preparation, 625

ST-T segment, left ventricular hypertrophy with hyperkalemic modifications of, 144

Surgery
for abdominal aneurysms, survival and complications after, 631
for aberrant origin of left coronary artery from pulmonary artery, 793
aortic valve replacement, total, 314
arrhythmias in post-operative period, 313
bilateral lumbar sympathectomy: effect on experimentally produced intermittent claudication, 149
cardiovascular, in infancy, 632
clinical diagnosis and surgical management of ruptured mitral chordae tendineae, 8
for congenital communications of right pulmonary veins with aygous vein, 439
feasibility of pulmonary embolectomy, 234
immunological studies in post-cardiomyopathy syndrome, 630
left ventricular aneurysms, surgical treatment of, 632
mitral valve. See Mitral valve, surgery myocardial infarction like syndrome in choledecystomized patients given narcotics, 941
open heart, electronic device for accurate identification of cardiac conduction system in, 314

Tachybradycardia

Tamponade

Techniques
arterial blood pressure measurements with portable
recorder, 582
augmentation of intercoronary anastomoses by
vasodilator drug, 794
closed chest cardiac massage, incidence of bone-
marrow embolism due to,
continuous dye infusion method for measuring
cardiac output, 470
direct detection and timing of aortic valve closure,
emergency treatment of cardiac arrest, 150
fluorescent antibody, demonstration of fibrin in
white plaque by, 620
for identifying P waves in complex arrhythmias,
indicator-dilution curves in systemic arteriovenous
fistulas, 472
indicator dilution method in measurement of local
venous flow, 945
inhibition of tonic cardiac sympathetic activity by
stimulation of brain septal region, 625
long-term anticoagulant therapy,
magnetocardiogram: new approach to fields sur-
rounding heart, 473
for making casts of heart, 953
method of managing superficial thrombophlebitis,
new instrument for obtaining indicator dilution
curves, 945
non-surgical retrieval of broken segment of steel
spring guide from right atrium and inferior
vena cava, 106
radioisotope heart scanning in detecting pericar-
dial effusion, 948
rapid-sequence intravenous pyelogram in diagnosis
of reno-vascular hypertension, 619
thermodilution for measurement of blood flow in
femoral artery, 86
transluminal treatment of arteriosclerotic obstruc-
tion, 654
treatment of tachycardias by external electric
shocks, 784

Tendons, tumors of, 149

Tetralogy of Fallot. See Fallot's tetralogy

Thermodilution for measurement of blood flow in
femoral artery, 86

Thioridazine hydrochloride, some cardio-vascular ac-
tions of, 303

Thoracic deformity in congenital cardiopathies, hem-
dynamic correlation of, 791

Thoracic loop formation, rare anomaly of aortic arch
with right, 790

Thorax of Davies, hemodynamic correlations of, 791

Thromboangiitis obliterans and arteriosclerosis ob-
literans: clinical and prognostic differences,
148

Thromboembolism
disease of brain, anticoagulant therapy in, 788
in patients receiving progestational drugs, 141
therapy of thrombo-embolic vascular accidents in
ophthalmology, 788

Thrombolysis, experimental use to dissolve blood clot
placed in pleural space of dogs of, 463

Thrombophlebitis, superficial, method of managing,
463

Thrombosis
acutie iliofemoral venous; thrombectomy in treating
45 patients, 139
arterial and venous, dextran used to prevent, 140
of axillary vein, 631
evidence against "rebound," after stopping oral
antiocoagulant drugs, 141
investigations on, 463
massive, of left venticle, 425
portal vein, in cirrhosis of liver, 628
serum-induced, activation product, factor IX, serum
thrombotic accelerator activity and, 798
serum and plasma-induced, role of factors XII, XI,
and IX in, 788

Transducers, improved, for external recording of arte-
rreal pulse waves, 470

Transposition of great vessels
complete and inverted, 792
total anomalous pulmonary venous drainage into
left innominate vein associated with, 918

Transseptal catheterization, Brockenbrough, 743

Transseptal puncture
left atrial
effect on cardiac output, 188
selective angiography of left heart after, 628

Tranylcypromine, hypertensive syndrome with, 949

Trendelenburg test, phlebographic, 314

Tricuspid valve
congenitally unguarded tricuspid orifice with pulmonary atresia, 911
Ebstein's anomaly associated with cardiomyopathy and pulmonary hypertension, 578
rupture of papillary muscle of, 588
study of right atrial pressure pulse in functional tricuspid, regurgitation and normal sinus rhythm, 190
traumatic tricuspid insufficiency, 217

Ts E loop, wide, significance of, 400

T-wave
change in normal newborn during first 7 days of life, 144
conditioning in electrocardiogram of bulbocapnine, 946

U

Ulceration of skin, ischaemic, dextran in, 787

V

Vagus nerves in arterial baroreflex bradycardia in rabbits, 305

Valsalva, sinus of, aneurysm and aortic insufficiency simulating rheumatic heart disease in, 148

Vascular accidents, thrombo-embolic, opthalmological therapy of, 788

Vascular disease, produced by kidney extracts, 950

Vascular mechanisms, and intrinsic regulation of cerebral circulation, 597

Vasodilators
action on myocardial contractility of several: comparative study, 304
in augmentation of intercoronary anastomosis, long-term administration of, 794
corony, evaluation by coronary arteriography of, 468

Vasopressor material in experimental renal hypertension, 474

Vectorcardiogram
abnormalities simulating myocardial infarction in normal heart, 943
corrected orthogonal electrocardiogram and, 853
correlation between vectorcardiographic and hemodynamic data in aortic or pulmonic stenosis patients, 511
differential vectorscope, in study of cardiac electrical fields, 945
Frank, in mitral stenosis, 865
"p sinistrocardiale" pattern in mitral stenosis, 942
study of bundle-branch block in dog, 944

Veins
arteries and, cardiac diagnosis from examination of, 272
left innominate, total anomalous pulmonary venous drainage into, 918
measurement of local venous flow by indicator dilution method, 945
removal of various lipoproteins from doubly-ligated segments of, in rabbit, 138
restriction of venous return: effect on hemodynamics of normals and congestive heart failure patients, 792

Vena cava
inferior continuation into ayzygos vein of, 790
non-surgical retrieval of broken steel spring guide from, 106
superior anastomosis to right pulmonary artery: cardio-pulmonary dynamics, 47
phlebographic diagnosis in congestion of drainage area of, 630

Venography of lower extremities, clinical value of, 629

Ventricle
activation process
bundle-branch block in light of: electrocardiographic study, 944
bundle-branch block in light of: vectorcardiographic study, 944
arrhythmias. See Arrhythmias, ventricular
cardiac, congenital diverticulum of, 791
dysrhythmia associated with atrial fibrillation, 784
fibrillation, in treatment of chronic atrial arrhythmias, paroxysmal, 17
of frog heart
movements of Ca in beating, 309
movements of Ca at rest and during contractures, 309

left
aneurysms, surgical treatment of, 632
angiography, transient myocardial damage during, 897
development of outflow tract obstruction of, 569
effects of impeding venous return on performance of normal and failing, 719
hypertrophy with hyperkalemic modifications of ST-T segment, 144
massive thrombosis of, 425
outflow tract obstruction, apex cardiogram in, 392
performance after digitalization in patients with and without heart failure, 358
underdevelopment in child with complete type persistent common atrioventricular canal, right axis deviation, clockwise QRS loop, and signs of, 755
well-developed muscle mass of, and increased life span associated with Fallot's tetralogy, 790
myocardial, growth and development of, 953
pressure, effect on electrical forces of heart of chronically increased, 511
rate in complete heart block, cardiac output as function of, 502
repetitive arrhythmia of, from artificial internal pacemaker, 493
right
aneurysm caused by selective angiography, 902
double-outlet, with intact interventricular septum, 745
hypertension, precordial lead patterns in, 562
infarction in, 621
infundibular stenosis of, 465
and left, relationship of blood flow and myocardial Rb^86 clearance in, 308
obstruction by aberrant muscular bands, 679
outflow obstruction, aneurysm of membranous septum plus interventricular septal defect producing, 429
septal defect. See Septal defect, ventricular systole, effect of Ca on duration of Q-T interval and, in dog, 311

**Viscosity, blood**, in congestive heart failure, changes in, 686

**W**

Water
retention, explanation for hypoosmolality in congestive heart failure and abnormal, 792
total body, in essential hypertension, 949

Weights, component cardiac: correlation with electrocardiographic patterns in 185 cases, 808

**X**

Xanthomas, importance of in cardiology, 149
Xenon, radioactive, in measurement of muscle blood flow, 27
