Research Applications Ready
For AHA Support in 1966

The American Heart Association is now accepting applications from research investigators for support of studies to be conducted during the fiscal year beginning July 1, 1966.

September 15, 1965, is the deadline for submitting applications for Established Investigatorships and Advanced Research Fellowships.

Applications for Grants-in-Aid must be submitted by November 1, 1965. Grants-in-Aid are made to experienced investigators to help underwrite the costs of specified projects, such as equipment, technical assistance and supplies.

Established Investigatorships, with a stipend of $11,000 and increments of $1,000 yearly, are awarded for five years to scientists of proven ability who have developed in their research careers to the point where they are independent investigators. An additional $1,000 is given as a grant to the investigator's institution.

Advanced Research Fellowships are awarded for one- or two-year periods to postdoctoral applicants who have at least one year of research training and experience at time of application but are not clearly qualified to conduct their own independent research. Base stipends begin at $6,500, plus dependency allowances and yearly increments. An additional $500 grant is made to the investigator's department.

The Association also appoints a limited number of investigators of unusual capacity and widely recognized accomplishment as Career Investigators, ensuring them of financial support throughout their careers. These awards are made by the AHA Board of Directors on recommendation of the Research Committee and not by application.

Research Fellowships, to provide training under experienced guidance for young scientists with doctoral degrees, are no longer being awarded by the American Heart Association. Instead, application for such support should be made to local Heart Associations.

The Association is continuing its program of Emergency Grants. These are made for one-year periods on a non-renewable basis.

Further information and application forms for research awards may be obtained from the Director of Research, American Heart Association, 44 East 23rd Street, New York, N. Y., 10010.

AHA Scientific Sessions Program is Outlined

Six programs on clinical cardiology have been planned for the American Heart Association's 38th Scientific Sessions, to be held October 15-17 at the Hotel Americana, Bal Harbour, Florida. The Clinical Sessions will consist of panels, symposia, lectures and papers reporting clinical investigations.

The program also includes simultaneous sessions on specialized subjects. These sessions are designed as a forum for reporting on basic investigations in the cardiovascular field. In addition, sessions will be devoted to reports of interest to physicians working in subspecialties.

The Lewis A. Conner Memorial Lecture
will be given at the opening General Session by Julius H. Comroe, Jr., M.D., Professor of Physiology and Director of the Cardiovascular Research Institute, University of California Medical Center, San Francisco.

The program this year will include a special one-day Session on Stroke. Cardiovascular Conferences will be held on Saturday evening for small and informal group discussions. There will be an all-day showing of cardiovascular films on Sunday. Scientific and industrial exhibits will be on display throughout the sessions.

Registration forms, which include applications for hotel reservations, may be obtained from the American Heart Association, 44 East 23rd Street, New York, N. Y. 10010.

Arteriosclerosis Council Meeting

The annual meeting of the Council on Arteriosclerosis of the American Heart Association will be held October 13 and 14 in the Hotel Deauville, Bal Harbour, Florida, immediately preceding the annual AHA Scientific Sessions. The Council sessions will be open to all interested individuals.

Additional information regarding the Council sessions may be obtained from the American Heart Association.

Rheumatic Fever Council Revises two Statements

The Committee on Prevention of Rheumatic Fever and Bacterial Endocarditis of the AHA Council on Rheumatic Fever and Congenital Heart Disease has issued two revised statements:

1. "Prevention of Bacterial Endocarditis," formerly a section of the Committee's statement on "Prevention of Rheumatic Fever." The statement continues to recommend that patients with rheumatic or congenital heart disease about to undergo certain types of dental and surgical procedures receive antibiotics. Suggested dosage schedules for the protection of these patients are outlined.

Both reports can be obtained from local Heart Associations or from the American Heart Association, 44 East 23rd Street, New York, N. Y. 10010.

3-Day Cardiology Course In St. Paul, Sept. 15-17

A postgraduate course, Three Days of Cardiology, is scheduled for September 15-17 in St. Paul, Minn., on the subject, "Functional Pathology of Valvular and Pericardial Disease: Congenital and Acquired Types."

The course, which will be directed by Jesse E. Edwards, M.D., is sponsored jointly by the AHA Council on Clinical Cardiology, Charles T. Miller Hospital, and the Minnesota Heart Association. Additional information may be obtained from the Director of Medical Education at the American Heart Association.

Insurance Fund Offers Medical Research Grants

The Life Insurance Medical Research Fund is now receiving applications for awards to be made July 1, 1966. September 15, 1965, is the deadline for receipt of applications for grants to institutions in aid of research on cardiovascular problems. Support is available for physiological, biochemical and other basic research, with some preference given to the cardiovascular area.

Further information and application forms may be obtained from the Scientific Director, Life Insurance Medical Research Fund, 1030 East Lancaster Ave., Rosemont, Pa. 19010.

Scholarship Available In Honor of Dr. Allen

Availability of a Memorial Scholarship in honor of the late Dr. Edgar V. Allen was announced jointly by the American Heart Association and the Minnesota Heart Association. The scholarship will provide three months of clinical training at the Mayo Foun-
Biomcultural Engineering
Program is Offered

A two-year program of academic and research studies leading to the degree of Master of Science in Biomedical Engineering is being offered by the Drexel Institute of Technology to life scientists with M.D. and Ph.D. degrees as well as to physical scientists and engineers.

Information about the courses may be obtained from the Director of Biomedical Engineering, Drexel Institute of Technology, 32nd and Chestnut Streets, Philadelphia, Pa.

Meetings Calendar

July 10-6: Tri-Organizational Scientific and Clinical Rehabilitation Conference (Ninth Annual), New York. Leo Berner, 2818 W. 8th St., Brooklyn 24, N. Y.

August 9-12: National Medical Association, Cincinnati. Dr. John T. Givens, 1108 Church St., Norfolk 10, Va.

August 22-27: American Congress of Physical Medicine and Rehabilitation, Philadelphia. Dr. O. Gulllickson, Jr., Minneapolis, Minn.

August 30-September 2: American Hospital Association, San Francisco. Dr. Edwin L. Crosby, 840 N. Lake Shore Drive, Chicago 60611.

September 15-17: 3 Days of Cardiology (Functional Pathology of Valvular and Pericardial Disease: Congenital and Acquired Types), St. Paul. Dr. F. J. Lewy, American Heart Association, 44 East 23rd St., New York 10010.

September 28-October 1: American Roentgen Ray Society, Washington, D. C. Dr. C. Allen Good, Mayo Clinic, Rochester, Minn.

September 29-October 1: American Association of Medical Clinics, Washington, D. C. Dr. R. S. Condile, 300 Homer Ave., Palo Alto, Calif.

October 28-November 3: Association of American Medical Colleges, Philadelphia. Dr. R. H. Young, 303 E. Chicago, Chicago 60611.

November 12-14: Association of Clinical Scientists, Washington, D. C. Dr. R. P. MacFate, 300 N. State, No. 5322, Chicago 60610.

Abroad

August 2-6: International Conference on High Pressure, Creusot, France. Prof. B. Vodar, Centre National de la Recherche Scientifique, B. P. 30, Seine-et-Oise, France.

August 25-29: International Congress of Neuro-
logical Surgery, Copenhagen. Dr. A. Earl Walker, Johns Hopkins Hospital, 601 N. Broadway, Baltimore 5, Md.

September 5-9: International Conference on the Biochemistry of Lipids (ninth), Noorwijk, Netherlands. Dr. J. Boldingh, Unilever Research Laboratorium, Mercatorweg 2, Vlaardingen, Netherlands.

September 5-10: International Congress of Neurology, Vienna. Vienna Academy of Medicine, Alserstrasse 4, Vienna IX, Austria.

September 15-17: Neurological Symposium, Prague, Czechoslovakia. Dr. I. Lesny, Katerinska 30, Prague.

September 16-24: NATO Advanced Study Institute on Methods for Lipid Research, Milan. Prof. Rudolfo Paoletti, University of Milan, Milano, Italy.

September 22-28: International Congress of Radiology, Rome A. Ratti, 44/1 via Moscova, Milano, Italy.

December 5-11: International Congress on Rheumatic Diseases, Buenos Aires. Dr. A. Caruso, Juncal 1875, Planta Baja, Buenos Aires.
CONTRIBUTORS TO THIS ISSUE

Paul Adams, Jr., M.D.
Associate Professor, Department of Pediatrics, University of Minnesota, Minneapolis, Minnesota.

Kurt Amplatz, M.D.
Associate Professor, Department of Radiology, University of Minnesota, Minneapolis, Minnesota.

Ray C. Anderson, M.D.
Associate Professor, Department of Pediatrics, University of Minnesota, Minneapolis, Minnesota.

A. Aviram, M.D.
Assistant, Medical Department “A”, Hadassah University Hospital and Hebrew University-Hadassah Medical School, Jerusalem, Israel.

D. Ben-Ishay, M.D.
Assistant, Medical Department “A”, Hadassah University Hospital and Hebrew University-Hadassah Medical School, Jerusalem, Israel.

S. Gilbert Blount, Jr., M.D.
Professor of Medicine, Head, Division of Cardiology, and Director of Cardiovascular Laboratory, Department of Medicine, University of Colorado Medical Center, Denver, Colorado.

Ralph L. Brandt, M.D.
Clinical Assistant Professor of Internal Medicine, Medical School, University of Michigan, Ann Arbor, Michigan.

Walter L. Bruetsch, M.D.
Director, Research Laboratories (Neuropathology and Pathology), Central State Hospital, Indianapolis; Clinical Professor of Neurology, Indiana University School of Medicine, Indianapolis, Indiana.

J. Michael Criley, M.D.
Assistant Professor of Medicine and Radiology, Departments of Medicine and Radiology, The Johns Hopkins University School of Medicine and The Johns Hopkins Hospital, Baltimore, Maryland.

Adele Csima, M.A.
Statistical Consultant, Sunnybrook (Department of Veterans Affairs) Hospital; Lecturer in Medical Statistics, Department of Epidemiology and Biometrics, School of Hygiene, University of Toronto, Toronto, Canada.

W. J. Czaczkes, M.Sc., Ph.D., M.D.
Instructor in Medicine, Laboratory of Clinical Research, Hadassah University Hospital and Hebrew University-Hadassah Medical School, Jerusalem, Israel.

William Dock, M.D.
Chief, Medical Service, Veterans Administration Hospital, Brooklyn, New York.

Jesse E. Edwards, M.D.
Director of Laboratories, The Charles T. Miller Hospital, St. Paul; Clinical Professor of Pathology, School of Medicine and Professor of Pathology, Graduate School, University of Minnesota, Minneapolis, Minnesota.

Ellis J. Epstein, M.D.
Fellow in Medicine, Departments of Medicine, The Johns Hopkins University School of Medicine and The Johns Hopkins Hospital, Baltimore, Maryland.

Frederick H. Epstein, M.D.
Professor of Epidemiology, School of Public Health, University of Michigan, Ann Arbor, Michigan.

Martin J. Frank, M.D.
Assistant Professor of Medicine, Seton Hall College of Medicine, Jersey City, New Jersey.

Harper K. Hellems, M.D.
Professor of Medicine, and Director, Division of Cardiovascular Diseases, Seton Hall College of Medicine; and Director, Thomas J. White Cardiopulmonary Institute, Jersey City, New Jersey.

J. O'Neal Humphries, M.D.
Instructor in Medicine, Department of Medicine, The Johns Hopkins University School of Medicine and The Johns Hopkins Hospital, Baltimore, Maryland.

Allen E. Hussar, M.D.
Chief, Medical Service, Veterans Administration Franklin Delano Roosevelt Hospital, Montrose, New York.

Albert A. Kattus, Jr., M.D.
Professor of Medicine, University of California, Center for Health Sciences, Los Angeles, California.

Marcus O. Kjelsberg, Ph.D.
Assistant Professor of Biostatistics and Research Associate In Epidemiology, School of Public Health, University of Michigan, Ann Arbor, Michigan.

George S. Kurland, M.D.
Assistant Clinical Professor of Medicine, Harvard Medical School; Visiting Physician and Chief, Cardiac Clinic, Beth Israel Hospital, Boston, Massachusetts.

Gilbert E. Levinson, M.D.
Associate Professor of Medicine, Seton Hall College of Medicine; Associate Director, Thomas J. White Cardiopulmonary Institute, Jersey City, New Jersey. Established Investigator of the Union County Heart Association.

J. Alick Little, M.D.
Research Associate, Sunnybrook (Department of Veterans Affairs) Hospital; Associate in Medicine, St. Michael's Hospital, University of Toronto, Canada.
Rex N. MacAlpin, M.D.
Assistant Professor of Medicine, University of California, Center for the Health Sciences, Los Angeles, California.

Raoul Malmerona, M.D.
Clinical Research Fellow, Medical Department I, Sahlgren's Hospital, University of Gothenburg, Gothenburg, Sweden.

L. D. Ostrander, Jr., M.D.
Assistant Professor of Internal Medicine, Medical School, and Research Associate in Epidemiology, School of Public Health, University of Michigan, Ann Arbor, Michigan.

David Pressman, M.D.
Research Fellow in Medicine (Cardiology), Beth Israel Hospital, Boston, Massachusetts.

Adolph J. Rabinovitz, M.D.
Research Associate, Department of Pathology, Michael Reese Hospital and Medical Center, Chicago, Illinois.

Edward B. Raftery, M.D.
Fellow in Medicine, Department of Medicine, The Johns Hopkins University School of Medicine and The Johns Hopkins Hospital, Baltimore, Maryland.

Gunay Raghib, M.D.
Fellow in Pediatrics, University of Minnesota, Minneapolis; Research Associate (Cardiovascular Pathology), The Charles T. Miller Hospital, St. Paul, Minnesota.

Robert D. Roe, M.D.
Research Fellow, Department of Medicine, Sunnybrook (Department of Veterans Affairs) Hospital, Toronto, Canada. Presently, U. S. Public Health Service (Neurology) Fellow, Department of Pharmacology, Cornell University Medical College, New York, New York.

Richard S. Ross, M.D.
Associate Professor of Medicine and Radiology, Departments of Medicine and Radiology, The Johns Hopkins University School of Medicine and the Johns Hopkins Hospital, Baltimore, Maryland.

Herbert D. Ruttenberg, M.D.
Formerly, Postdoctoral Fellow (HF 13,715), National Heart Institute, U. S. Public Health Service; Research Associate (Cardiovascular Pathology), The Charles T. Miller Hospital, St. Paul, Minnesota. Presently, Assistant Professor, Department of Pediatrics, University of California, Los Angeles, California.

E. Sadowsky, M.D.
Instructor in Gynecology and Obstetrics, Department of Gynecology and Obstetrics, Hadassah UniversityHospital and Hebrew University-Hadassah Medical School, Jerusalem, Israel.

Otto Saphir, M.D.
Deceased. Formerly, Director, Department of Pathology, Michael Reese Hospital and Medical Center, Chicago, Illinois.

Henry M. Shanoff, M.D.
Research Associate, Sunnybrook (Department of Veterans Affairs) Hospital; Chief of Cardiology, Department of Medicine, Doctors Hospital, Toronto, Canada.

John Shillingford, M.D., F.R.C.P.
Director, Medical Research Council's Cardiovascular Research Group, Department of Medicine, Postgraduate Medical School, Hammersmith Hospital, London, England.

Michael Thomas, M.A., M.B., M.R.C.P.
Clinical Research Fellow, Medical Research Council's Cardiovascular Research Group, Department of Medicine, Postgraduate Medical School, Hammersmith Hospital, London, England.

T. D. Ullmann, M.D.
Associate Professor of Medicine, Head, Laboratory of Clinical Research, Medical Department "A", Hadassah University Hospital and Hebrew University-Hadassah Medical School, Jerusalem, Israel.

John H. K. Vogel, M.D.
Advanced Research Fellow, American Heart Association, Cardiovascular Laboratory, Department of Medicine, University of Colorado Medical Center, Denver, Colorado.

Mark E. Winfield, M.D.
Lecturer in Medicine, University of California, Center for the Health Sciences, Los Angeles, California.

Ruth Yano
Research Assistant, Sunnybrook (Department of Veterans Affairs) Hospital, Toronto, Canada.

pre- and postoperative vectorcardiograms in, 85
total correction of, 385, 394
EKG changes after, 394
Toxemia of pregnancy
experimental fluid infusion during prehypertensive state following, 863
late vascular effects of, 937
Toxoplasmosis, myocardial, 936
Thermodilution, right ventricular volumes determined by, in patients with and without heart failure, 531
Thoracic duct, age-related changes and lipid in wall of, 899
Thromboembolism, postoperative
effects of age and immobilization on incidence of, 790
after surgery on neck of femur, prevention of, 789
Thrombosis, mural, with subsequent embolism of internal carotid artery, 314
of subclavian artery, 315
Thyroid, as related to myocardial catecholamine concentration, 146
Thyrototoxicosis, catecholamine depletion in, 219
Transaminase levels in rats, changes in, after exercise, 143
Tricuspid valve, competence of, in pulmonary heart disease, 517
Trypsin
transmembrane potentials of trypsin-dispersed chick heart cells cultured in vitro, 146
Turner’s syndrome. See Syndrome

V
Valvotomy and valvuloplasty. See Surgery, cardiac
Vectorcardiogram
analog computer model of, 45
pre- and postoperative, in tetralogy of Fallot, 85
QRS, in congenital heart disease during first year of life, 794

Circulation, Volume XXXI, June 1965
Vena cava
inferior, in differential diagnosis of septal defects, 943
left superior
coronary vs. sinus rhythm in, 932
termination of, in left atrium, with atrial defect
and absence of coronary sinus, 906
shunt. See Cardiac shunt
Venography, coronary, anatomy of coronary circulation in vivo, 778
Ventricular
extrasystoles
anomalous ventricular complexes of RBBB-type
in lead V6, differential morphology of, 551
outflow tract, left, obstruction of, 585
pathology, 586
recognition of, 600
surgical treatment of lesions, 612
Water hardness, as related to cardiovascular deaths in Oklahoma, 305
Wenkebach heartblock, induction of, by daily running, 622
Work Evaluation Unit, Cardiac (Boston), work experience of patients following referral to, 497
X
Xanthomatosis. See Hypercholesteremia
