New Officers Chosen
At AHA Annual Meeting

Walter B. Frommeyer, Jr., M.D., was named President-elect of the American Heart Association at its Annual Meeting in San Francisco. At the same time, Jesse E. Edwards, M.D. of St. Paul, Minn., Director of Laboratories at Charles T. Miller Hospital and Clinical Professor of Pathology at the University of Minnesota School of Medicine, was installed as President for the 1967-68 term.

Dr. Frommeyer is Professor of Medicine and Chairman of the Department of Medicine at the University of Alabama Medical Center, and Physician-in-Chief at the University Hospital.

Born in Cincinnati, he received an A.B. from the University of Cincinnati in 1939 and his M.D. from its College of Medicine in 1942. Long active in the work of both the American Heart Association and its affiliate in Alabama, Dr. Frommeyer has served on the national organization’s Board and Executive Committee since 1960 and was a Vice President from 1963-66. He has served the Alabama Heart Association since 1954, as President in 1958-59 and as Chairman of the Board in 1959-60.

Dr. Lewis E. January, retiring President, became Chairman of the Association’s Central Committee for Medical and Community Program.

The Officers were elected by the Assembly, AHA’s national delegate body, which also elected nine Vice Presidents, a Treasurer and 28 members of the Board.

Newly-elected Vice Presidents are John S. Andrews, Youngstown, Mrs. Mason G. Lawson, Little Rock, and Dr. Francis F. Rosenbaum, Milwaukee. Re-elected Vice Presidents are Dr. Eugene Braunwald, Bethesda, Dr. Arthur Feinfield, Sherman Oaks, Cal., Dr. W. Proctor Harvey, Washington, D.C., Lowell Johnson, New York, Dr. Lysle H. Peterson, Philadelphia, and Ross Reid, New York. Willard C. Butcher, New York, was re-elected Treasurer.

AHA Screening Abstracts
For Cardiology Congress

Abstracts of papers to be presented by U. S. physicians and scientists at the Eighth Inter-American Congress of Cardiology in Lima, Peru, April 21-27, 1968, must be submitted through the American Heart Association. The deadline for receipt of abstracts has been set for December 21, 1967.

The Congress, under joint sponsorship of the Interamerican and Peruvian Societies of Cardiology, is being held on the grounds of the Pacific International Trade Fair.

Preliminary programs for the Congress and application forms for submitting abstracts and registering for attendance may be obtained from Alfred M. Bennett, M.D., AHA’s Department of Councils and International Program, 44 E. 23rd St., New York, N. Y. 10010.

Travel arrangements may be made through SITA World Travel, 50 Rockefeller Plaza, New York, N. Y. 10020.

New Training Film
Produced on CPR

A new film designed as a basis for training courses for physicians and nurses in emer-
Emergency cardiopulmonary resuscitation has been produced by Bandelier Films. Among the supporting sponsors were the American Heart Association and its affiliates in Arizona, Michigan and New Mexico.

Entitled “Prescription for Life,” the 48-minute, 16mm, color film provides detailed anatomic and physiologic experimental and clinical information covering airway, breathing, circulation and definitive treatment in emergency resuscitation. These steps are detailed in laboratory and demonstration sequences. The film also includes dramatic re-enactments of CPR emergencies in the operating and emergency room, intensive care unit, hospital ward and emergency situations outside the hospital.

Prints of the film may be obtained on a purchase or loan basis through local Heart Associations.

New Officers Elected By Association’s Councils

Five scientific Councils of the American Heart Association have elected new officers as follows:

Council on Arteriosclerosis: Daniel Steinberg, M.D., Bethesda, Md., Chairman; Henry C. McGill, Jr., M.D., San Antonio, Vice Chairman.

Council on Circulation: J. Edwin Wood, III, M.D., Charlottesville, Va., Chairman; John W. Eckstein, M.D., Iowa City, Vice Chairman.

Council on Clinical Cardiology: W. Proctor Harvey, M.D., Washington, D. C., Chairman; Paul N. Yu, M.D., Rochester, N. Y., Vice Chairman.

Council on Epidemiology: Frederick H. Epstein, M.D., Ann Arbor, Mich., Chairman; Henry Blackburn, M.D., Minneapolis, Vice Chairman.

Council on Rheumatic Fever and Congenital Heart Disease: Sidney Blumenthal, M.D., New York, Chairman; Milton Markowitz, M.D., Baltimore, Vice Chairman.

Officers of the Association’s four other Councils, on Basic Science, Cardiovascular Surgery, Cerebrovascular Disease and High Blood Pressure Research, will continue to serve for the coming year.

Council on Epidemiology Invites New Members

Physicians and scientists are invited by the Executive Committee of AHA’s Council on Epidemiology to join the Council and participate in its exciting and challenging programs.

Organized in 1964 to further scientific knowledge about the epidemiology of cardiovascular diseases, the Council conducts its own annual scientific and business meetings in addition to participating in the annual Scientific Sessions of the American Heart Association.

Applications for membership may be obtained through local Heart Associations.

4 European Scientists Share Stouffer Prize

The $50,000 Stouffer Prize for 1967 was awarded to four European scientists whose original investigations helped to advance knowledge of hypertension and arteriosclerosis. They are Drs. U. S. von Euler of Stockholm, Peter Holtz of Frankfurt, and J. W. Cornforth and George J. Popjak, both of London.

The awards were conferred on Nov. 10 at a dinner held in Cleveland in conjunction with the annual scientific meeting of AHA’s Council for High Blood Pressure Research. Vernon Stouffer, president and chief executive officer of Stouffer Foods Corporation, presented the prize to be shared by the four scientists.

Established in 1966 by the Vernon Stouffer Foundation for distinguished research in the fields of hypertension and arteriosclerosis, the initial award was shared by Dr. Harry Goldblatt of Cleveland and Dr. Ernest Klenk of Cologne, Germany.
Scholarships Available
For Medical Students

Applications are now being accepted for the 1968 Edgar V. Allen Memorial Scholarships which provide three months of clinical training for medical students at the Mayo Graduate School of Medicine.

The scholarships were established in memory of the late Dr. Edgar Van Nuys Allen, former President of the American Heart Association. The Association co-sponsors the awards with the Minnesota Heart Association. Full-time junior and senior medical students who attend approved medical schools in the U. S. or Canada may apply through the Minnesota Heart Association, 1821 University Ave., St. Paul, Minn., 55104.

Meetings Calendar

January 15-17: American College of Surgeons (Sectional Meeting), Vancouver, British Columbia. Dr. John P. North, 55 E. Erie, Chicago 60611.

February 19-21: 3 Days of Cardiology (Cardiac Advances of Current Interest), New York City. Medical Education Department, AHA, 44 E. 23rd St., New York 10010.

May 2-4: Symposium, Prevention in Cardiology, Rochester, Minn. Dr. Henry Blackburn, University of Minnesota, Minneapolis 55455.

May 13-15: 3 Days of Cardiology (Etiology and Treatment of Thromboembolic Disease), Hamilton, Ontario, Canada. Medical Education Department, AHA, 44 E. 23rd St., New York 10010.

May 15-20: International Congress of Lymphology, Miami Beach. Dr. Manuel Viamonte, Jr., University of Miami Medical School, Miami, Fla. 33136.

September 25-27: 3 Days of Cardiology, (Problems Affecting the Cerebral Renal and Peripheral Circulation), Cleveland. Medical Education Department, AHA 44 E. 23rd St., New York 10010.

Abroad

September 1-6: Asian-Pacific Congress of Cardiology, Jerusalem and Tel Aviv. Dr. L. Sherf, Tel Hashomer Government Hospital, Tel Hashomer, Israel.

September 10-14: International Congress of Internal Medicine, Warsaw. Institute for Postgraduate Medical Education, ul. Solec 93, Warsaw 30, Poland.

SUBJECT INDEX

(Page numbers in Italics refer to abstracts)

A

Aberrant ventricular conduction  
experimental production in man, 673

Acetylsalicylic acid  
properties of diphenylhydantoin sodium compared to procaine amide, 108

prophylactic use of diphenylhydantoin sodium, 119

Adrenals  
hyperventilation and precordial T waves, 700

Adrenergic  
noradrenaline release and metabolism in orthostatic hypotension, 489

Adrenergic blockade  
beta-adrenergic blockade  
effects of propranolol on patients with complete heart block and implanted pacemakers, 534

evaluation of contractile state of human heart from the first derivative of the apexcardiogram, 933

Adrenergic stimulation  
evaluation of contractile state of human heart from first derivative of the apexcardiogram, 933

Age  
carotid endarterectomy for cerebral ischemia and infarction, 212

and hemodynamic response to exercise, 222

Aging  
cerebrovascular disease in the elderly, 394

influence of hypertension on hemodynamic response to exercise, 231

Ameroid constrictor  
quinidine after myocardial infarction, 294

p-Aminohippurate extraction  
renal response to pyrogen, 555

Amyl nitrite  
muscular subaortic stenosis, 36

Amyloidosis  
noradrenaline in orthostatic hypotension, 489

Anastomoses  
coronary artery steal syndrome, 878

subclavian-pulmonary arterial postpartum death from congenital heart disease, 304

Aneurysms  
cineangiocardio graphic studies of left ventricle in patients with angina pectoris, 868

Angina pectoris  
anomalous left coronary artery arising from pulmonary artery, 878

in aortic stenosis, 480

cineangiocardio graphic studies of left ventricle in patients with, 868

coronary artery steal, 878

coronary disease in familial hypercholesterolemia, 77

distribution of arterial lesions demonstrated by selective cinecoronary arteriography, 54

exercise electrocardiography, 517

exercise in healed myocardial infarction without angina, 734

tall-upright T waves, 708

Angiocardiology  
acute mitral regurgitation, 839

aortic origin of right pulmonary artery, surgical repair without a graft, 777

evaluation of roentgen cinedensitometry for flow measurement in models and intact circulation, 951

intramural ventricular cardiac fibroma, 427

left ventricle and mitral valve

in idiopathic hypertrophic subaortic stenosis, 852

Angiography  
anatomy of left ventricle and mitral valve in idiopathic hypertrophic subaortic stenosis, 852

coronary artery steal, 878

of left ventricle, 868

ventricular heart muscle disease in Nigerian adults, 460

volume mechanisms of pulsat alternans, 372

Angiotensin  
muscular subaortic stenosis, 36

Animals  
dogs

evaluation of roentgen cinedensitometry for flow measurement in models and intact circulation, 951

myocardial biopsies, 94

thoracic duct-to-pulmonary vein shunt in treatment of right heart failure, 539

pigs

quinidine after myocardial infarction, 294

rats

inheritance of coronary artery anatomic patterns, 771

Ankles  
systolic blood pressure

effect of physical training, 23

effect of repetition and intensity of exercise, 15

Anomalous left coronary artery  
cardiac potentials on body surface of infants with, 345

Anomalous right pulmonary artery  
surgical repair without a graft, 777

Aorta  
anomalous right pulmonary artery arising from ascending aorta, 777

blood flow effects of mitral regurgitation on pattern of instantaneous aortic blood flow, 45

cogulant and thrombogenic properties of human atheroma, 284

trunical inversion with biventricular pulmonary trunk and aorta from right ventricle, 783

Aortic stenosis  
assessment from aortic pressure pulse, 30

mechanisms of angina pectoris in, 480

mechanisms of pulsus alternans, 372

subvalvular

idiopathic hypertrophic subaortic stenosis, 852

valvular stenosis produced by active infective endocarditis, 449

Aortic valve  
area

assessment of aortic valvular stenosis from aortic pressure pulse, 30
INDEX

[Aortic valve–Bioassay technique]

disease
measurement of pulmonary edema, 381
insufficiency
complication of valve replacement by a caged-
leak prosthesis, 422
tortuosity and lengthening of the arteries, 400
Apexcardiography
evaluation of contractile state of human heart from
first derivative of, 933
myxoma of left atrium, 408
Arrhythmias
atrial flutter associated with isolated pulmonic ste-
nosis, 313
blood pressure determination, 984
effect of diphenylhydantoin on, 108, 119, 692
electrocardiograph for listening to, 810, 975
paroxysmal ventricular tachycardia with rate-de-
pendent coupling intervals, 253
re-entry
properties of diphenylhydantoin sodium compared
to procaine amide, 108
termination of reciprocating tachycardia by atrial
stimulation, 637
Arterial compliance
assessment of aortic valvular stenosis from aortic
pressure pulse, 30
Arteries
dysplasia
tortuosity and lengthening of arteries, 400
lesions
distribution demonstrated by selective cinecoro-
nary arteriography, 54
in infants with congenital rubella, 544
medial cells, 1
occlusions
large and small artery occlusion in diabetics and
nondiabetics with severe vascular disease, 83
pressure
assessment of aortic valvular stenosis from aortic
pressure pulse, 30
Arteriography
cinecoronary, 526
distribution of arterial lesions, 54
coronary
exercise electrocardiography, 517
vectorcardiographic changes during intracoronary
injections, 63
coronary cinearteriography, 526
selective coronary
exercise in healed myocardial infarction, 734
percutaneous femoral artery approach, 730
Arteriosclerosis obliterans
exercise and intermittent claudication
effect of physical training, 23
effect of repetition and intensity of exercise, 15
Arteriovenous fistula

systolic blood pressure in aviator cohort study over twenty-four-year period, 812
coronary heart disease in women, 577
relationship between hyperglycemia and myocardial infarction, 609

Ethacrynic acid
antihypertensive properties of furosemide, 125

Ethyl-a-p-chlorophenoxyisobutyrate
present state of clofibrate (Atromid-S), 337

Excitation anomaly
atrioventricular and ventriculoatrial excitation in WPW syndrome, 663

Exercise
effect of artificial pacing of the heart on cardiac and renal function, 717
healed myocardial infarction, 734
hemodynamic response to influence of age on, 222
influence of hypertension on, 231
and intermittent claudication
effect of physical training, 23
effect of repetition and intensity of exercise, 15
myocardial blood flow in man as measured by coincidence counting system and single bolus of 84RbCl, 187
tests
comparation of double two-step and maximal exercise test on treadmill; studies in coronary-prone subjects, 238
electrocardiographic changes in clinically normal older men following maximal and near maximal exercise, 5
upright
physiological significance of maximal oxygen intake in “pure” mitral stenosis, 497

Extrasystoles
paroxysmal ventricular tachycardia with rate-dependent coupling intervals, 253

F

Family studies
chromosomal abnormalities and congenital heart disease, 886
coronary heart disease, study of risk factors in women, 577
familial hypercholesterolemia
coronary disease in, 77

Fatty acids
free
present status of clofibrate (Atromid-S), 337

Femoral artery
percutaneous femoral artery approach to selective coronary arteriography, 730

Fibers
velocity of shortening
comparative study of nitroglycerin and propranolol, 175

Fibroma
intramural ventricular cardiac, 427

Fibromuscular dysplasia
vascular lesions in infants with congenital rubella, 544

Fistula
arteriovenous
coronary artery steal, 878

Fungal vegetations
valvular stenosis produced by active infective endocarditis, 449

Furosemide
antihypertensive properties of, 125

Electrocardiograms—Furosemide
listening to, 810
orthogonal leads
digital computer analysis of vectorcardiograms of newborn infants, 906
new concept in ECG lead design, 320
P wave
computer techniques for detection and analysis of spontaneous P-wave variations, 359
pattern recognition
decision rules in electrocardiography and vectorcardiography, 136
precordial T waves
effect of hyperventilation on, 700
QRS complexes
listening to, 810
serial changes in treated hypertension, 823
supraventricular tachycardia in Wolff-Parkinson-White syndrome, 644
QRS spatial curves
digital computer analysis of vectorcardiograms of newborn infants, 906
serial changes in treated hypertensive patients, 823
signal averaging
application of computer techniques to detection and analysis of spontaneous P-wave variations, 359
ST-segment measurement
electrocardiographic changes in clinically normal older men following near maximal and maximal exercise, 5
T waves, 810
effect of hyperventilation on precordial T waves of children and adolescents, 700
tall upright T waves in precordial leads, 708
tape recordings
of active men, limitations and advantages of Holter-Avionics instruments, 752
vectorcardiograms of newborn infants, 906
vectorcardiographic changes during intracoronary injections, 63
ventricular tachycardia
reevaluation of ECG and bedside criteria for diagnosis of, 628
voltage criteria
serial changes in treated hypertension, 823
Electrocardiophone, 810
new instrument for rapid bedside diagnosis of arrhythmias, 975
Electrodes
intracardiac
termination of reciprocating tachycardia by atrial stimulation, 637

Electrophysiology
aberrant ventricular conduction, 673
vectorcardiographic changes during intracoronary injections, 63

Emboli
pulmonary air embolism
during insertion of permanent transvenous cardiac pacemaker, 458

Emotional stimuli and vasospasm
Raynaud’s disease in children, 724

Endarterectomy
carotid
long-term results in cerebral ischemia and infarction, 212

Endocarditis
valvular stenosis produced by infective, 449

Environmental factors
atherosclerosis and carbohydrate nutrition, 340

Epidemiological studies
blood pressure, 986
cardiac diseases and psittacosis, 830
G

Gangrene
large and small artery occlusion in diabetics and
nondiabetics with severe vascular disease, 83

Genetics
inheritance of coronary artery anatomic patterns in
rats, 771
systolic blood pressure in aviator cohort study, 812

Glomerular filtration rate
effect of artificial pacing of the heart, 717
measurement of effective renal plasma flow and, by
iothalamate 125I and idopyracet 35I, 441

Glomerulonephritis
ballistocardiograph in acute cardiomyopathy, 92

Glucose
monitoring cerebral blood flow, oxygen, and glucose metabolism, 197
tolerance
coronary heart disease, study of risk factors in
women, 577
relationship between hyperglycemia and myocardial infarction, 609

Graded exercise test (G XO)
electrocardiographic changes in clinically normal older men following near maximal and
maximal exercise, 5

Great vessels. See Transposition of great vessels

H

Hamartoma, cardiac
ventricular fibroma, 427

Heart beats
role of premature beats in initiation and termina-
tion of supraventricular tachycardia in
Wolff-Parkinson-White syndrome, 644

Heart block
complete
effect of artificial pacing, 717
effect of propranolol on patients with implanted
pacemakers and, 534
pulmonary air embolism, 456
ventricular tachycardia, 629

Heart disease
pisittacosis and, 830

Heart failure
congestive
acute mitral regurgitation, 839
effect of artificial pacing of heart on cardiac and
renal function, 717
distribution of arterial lesions demonstrated by
selective cinecoronary arteriography, 54
right
thoracic duct-to-pulmonary vein shunt in treat-
ment of, 539

Support of the Failing Circulation: The Use of a Pump Oxygenator in Clinical Cardiac Failure (Kennedy), 992

Heart muscle disease
radiological aspects of, in Nigerian adults, 460

Heart rate
age and hemodynamic response to exercise, 222
effect of diphenylhydantoin on left ventricular func-
tion, 692
maximal heart rate related to age
electrocardiographic changes in clinically normal
older men following near maximal and
maximal exercise, 5

Heart size
electrocardiographic changes in treated hyperten-
sion, 823

Heart sounds
analysis in right and left bundle-branch blocks, 275
Auscultation of the Heart (Ravin), ed. 2, 331
ejection sound
calculated left atrial myxoma, 417
electrocardiophone for timing murmurs and, 975

Hemoglobin
cerebrovascular disease in elderly, 394

Hemodynamics
acute mitral regurgitation, 839
calculated left atrial myxoma, 417
comparative study of nitroglycerin and proprano-
lol, 175
exercise
influence of age on, 222
influence on hypertension, 231
in healed myocardial infarction without angina, 734
hypertension
tilt test for investigating neural component in
hypertension, 387
idiopathic hypertrophic subaortic stenosis, 852
myxoma of left atrium, 408
pacemakers
effects of propranolol, 534
pulmonic stenosis,
vascular changes studied in lung biopsies, 924
tetralogy of Fallot
vascular changes studies in lung biopsies, 924

Hepatic clearance of indocyanine green
oxygen intake in mitral stenosis, 497

Hereditary factors
inheritance of coronary artery anatomic patterns in
rats, 771
systolic blood pressure in aviator cohort study over
twenty-four-year period, 812

Histology
artifacts
myocardial biopsies in dogs, 964

Holter-Avionics instruments
tape recordings of ECG, 752

Hyperbetalipoproteinemia
present status of clofibrate (Atromid-S), 337

Hypercholesteremia
coronary heart disease, study of risk factors in wom-
ien, 577
familial
coronary disease in, 77
present status of clofibrate (Atromid-S), 337

Hypercoagulability
cogulant and thrombogenic properties of human
atheroma, 284

Hyperfibrinogenemia
blood rheology studies, clinical implications, 148

Hyperglycemia
risk factor in coronary heart disease, 609

Hyperinsulinism
relationship between hyperglycemia and myocardial
infarction, 609

Hyperkalemia
tall-upright T waves, 708

Hyperlipidemia
present status of clofibrate (Atromid-S), 337

Hypertension
carotid endarterectomy for cerebral ischemia and
infarction, 212
coronary heart disease, study of risk factors in
women, 577
furosemide, antihypertensive properties of, 125
influence on hemodynamic response to exercise, 231
monitoring cerebral blood flow, oxygen, and glucose
metabolism, 197

Mitral stenosis
deleterious role of tachycardia in, 511
physiological significance of maximal oxygen intake in, 497
valvular stenosis produced by active infective endocarditis, 449

Mitral valves
angiocardiology
in idiopathic hypertrophic subaortic stenosis, 852
disease
measurement of pulmonary edema, 381
incompetence
coronary artery steal, 878
heart muscle disease in Nigerian adults, 460
insufficiency
calcified left atrial myxoma simulating, 417
regurgitation; see Mitral regurgitation
replacement
caged-lens prosthesis, complications of, 422
stenosis. See Mitral stenosis
surgery
acute mitral regurgitation, 839
Mortality
carotid endarterectomy for cerebral ischemia and infarction, 212
coronary disease in familial hypercholesteremia, 77
patients with cardiac pacemakers, 473
quinidine after myocardial infarction, 294
Muscular subaortic stenosis
direct relation between intraventricular pressure difference and left ventricular ejection time, 36
Myocardial infarction
cardiac potentials on body surface of infants with anomalous left coronary artery, 345
cineangiographic studies of left ventricle, 868
distribution arterial lesions demonstrated by selective cinecoronary arteriography, 54
experimental
quinidine after, 294
hemodynamic response to exercise in patients with healed myocardial infarction with angina, observations on effects of nitroglycerin, 734
hyperglycemia, risk factor in coronary heart disease, 609
inheritance of coronary artery anatomic patterns in rats, 771
tall upright T waves in precordial leads, 708
Myocarditis
associated with serological evidence of infection by psittacosis agent, 830
ballistocardiography in acute cardiomyopathy, 92
Myocardium
biopsies in dogs, 964
blood flow as measured by a coincidence counting system and a single bolus of 82RbCl, 187
contractility
effects of propranolol on patients with complete heart block and implanted pacemakers, 534
evaluation of contractile state of human heart from first derivative of the apexcardiogram, 933
ischemia
exercise test in coronary heart disease, 238
Myxoma
calcified left atrial, simulating mitral insufficiency, 417
of left atrium, 408

N

Negroes
hyperventilation and precordial T waves in children and adolescents, 700
Nervous system
Raynaud’s disease in children, 724
INDEX
1009
diphenylhydantoin and atrioventricular conduction, 686
Cardiac Pacemakers (Siddons and Sowton), 620
clinics for follow-up care, 473
effect on cardiac and renal functions, 717
failure
use of electrocardiophone, 975
follow-up care for patients with, 473
implanted pacemakers
after-care of patients, 476
effects of propranolol on patients with complete
heart block and, 534
insertion of permanent transvenous
pulmonary air embolism during, 456
problems and responsibilities in use of electric pacemake-
er, 478
replacement of, 473
Pain
exercise and intermittent claudication
effect of physical training, 23
effect of repetition and intensity of exercise, 15
mechanisms of angina pectoris in aortic stenosis,
480
Papillary muscle
ruptured
acute mitral regurgitation, 839
Para-amino-hippuric acid (PAH)
measurement of glomerular filtration rate and
effective renal plasma flow by iothalamate
125I and iodopyracet 191I, 441
renal response to pyrogen in normotensive and
hypertensive man, 555
Parental longevity
systolic blood pressure in aviator cohort study
over twenty-four-year period, 812
Paroxysmal ventricular tachycardia
with rate-dependent coupling intervals, 255
Pathology
Cardiac Pathology (Lannigan), 161
genital cardiac disease associated with polysple-
nia, 789
idiopathic hypertrophic subaortic stenosis, 852
myocardial biopsy in dogs, 964
Pericarditis
psittacosis and acute, 830
Pericardium
role in early phase of acute mitral regurgitation,
839
Perimyocarditis
psittacosis and, 830
Peripheral resistance
age and hemodynamic response to exercise, 222
hypertension and hemodynamic response to ex-
ercise, 231
extraction coefficient
angina in aortic stenosis, 480
maximal oxygen uptake
physiological significance of maximal oxygen in-
take in "pure" mitral stenosis, 497
Peripheral vascular disease
artery occlusion in diabetics and nondiabetics with
severe vascular disease, 83
Pharmacology
muscular subaortic stenosis, 36
Phonocardiography
analysis of heart sounds in right and left bundle-
branch blocks, 275
calciied left atrial myxoma, 417
myxoma of left atrium, 408
ventricular tachycardia
reevaluation of ECG and bedside criteria for
diagnosis of, 628
Physical work capacity
cineangiographic studies of left ventricle, 868
Physiology
significance of maximal oxygen intake in "pure"
mitral stenosis, 497

P
computer techniques for detection and analysis of
spontaneous P-wave variations, 359
Pacemakers and pacing
atrial
aberrant ventricular conduction, 673
computer techniques for detection and analysis
of spontaneous P-wave variations, 359

P wave
computer techniques for detection and analysis of
spontaneous P-wave variations, 359

P acemakers and pacing
atrial
aberrant ventricular conduction, 673
computer techniques for detection and analysis
of spontaneous P-wave variations, 359

Neurological episode
carotid endarterectomy for cerebral ischemia and
infarction, 212
Neuron
sympathetic neuron degeneration
noradrenaline release and metabolism in ortho-
static hypotension, 489
Nigerian adults
radiological aspects of heart muscle disease, 460
Nitroglycerin
comparative study of propranolol and, 175
exercise in healed myocardial infarction without
angina, 794
Norepinephrine
muscular subaortic stenosis, 36
noradrenaline release and metabolism in ortho-
static (postural) hypotension, 489
Nutrition
relationship between hyperglycemia and myocardial
infarction, 609
Nylinidrin
monitoring cerebral blood flow, oxygen, and glucose
metabolism, 197

O
Occlusions
arterial
in diabetics and nondiabetics with severe vascu-
lar disease, 83
coronary
distribution of arterial lesions demonstrated by
selective cinecoronary arteriography, 54
quinidine after myocardial infarction, 254
Orthopnea
acute mitral regurgitation, 839
Ouabain
diphenylhydantoin and atrioventricular conduction,
686
Oxidation-reduction potential
comparative study of nitroglycerin and propranolol,
175
Oxygen
consumption
age and hemodynamic response to exercise, 222
monitoring cerebral blood flow, glucose metabolis-
and, 197
hypertension and hemodynamic response to ex-
ercise, 231
extraction coefficient
angina in aortic stenosis, 480
maximal oxygen uptake
physiological significance of maximal oxygen in-
take in "pure" mitral stenosis, 497
Oxygenators
Support of the Failing Circulation: The Use of a
Pump Oxygenator in Clinical Cardiac
Failure (Kennedy), 992

Circulation, Volume XXXVI, December 1967
Plasma
cardioglobulin B content of blood plasma of newborn infants, 766
renin activity
prognostic value in renovascular hypertension, 570
volume
antihypertensive properties of furosemide, 125

Plethysmography
Raynaud's disease in children, 724

Polycythemia
blood rheology studies, clinical implications, 148

Polysplenia
congenital cardiac disease associated with polysplenia, 789

Postpartum death
with congenital heart disease, 304

Pott's operation
vascular changes in pulmonic stenosis and tetralogy of Fallot studied in lung biopsies, 924

Premature beats
effect of propranolol on patients with complete heart block and implanted pacemakers, 534
role in initiation and termination of supraventricular tachycardia in Wolff-Parkinson-White syndrome, 644

Pressure. See Blood pressure

Primary myocardial disease
psittacosis and, 830

Procaine amide
properties of diphenylhydantoin sodium compared to, in normal digitalis-intoxicated heart, 108
prophylactic use of diphenylhydantoin sodium, 119

Propranolol
comparative study of nitroglycerin and, 175
effects on patients with complete heart block and implanted pacemakers, 534

Prostheses
caged-lens prosthesis
complications of valve replacement, 422
Cross-Jones discoid valve, 422
Huftang discoid valve, 422

Psittacosis
pericardial and myocardial disease associated with, 830

Pulmonary air embolism, 456

Pulmonary arteries
anomalous left coronary artery arising from pulmonary artery, 878
anomalous right pulmonary artery, surgical repair without a graft, 777
atrial flutter associated with isolated pulmonic stenosis, 313
disease
postpartum death from heart disease, 304
edema
measurement of, in valvular heart disease, 381
intimal fibrosis, 924
pressure
role of tachycardia in mitral stenosis, 511
regurgitation
absence of pulmonic valve associated with double-outlet right ventricle, 452
trunal inversion with biventricular pulmonary trunk and aorta from right ventricle, 783
vascular lesions
in infants with congenital rubella, 544

Pulmonary extravascular fluid volume
measurement of pulmonary edema in valvular heart disease, 381

Pulmonary stenosis
measurement of pulmonary edema in valvular heart disease, 381
thoracic duct-to-pulmonary vein shunt in treatment of experimental right heart failure, 539
vascular changes in tetralogy of Fallot and, studied in lung biopsies, 924
vascular lesions in infants with congenital rubella, 544

Pulmonary vascular disease
cor triatriatum, 101
postpartum death from congenital heart disease, 340

Pulmonary veins
acute mitral regurgitation, 839
congenital cardiac disease associated with polysplenia, 789

Pulmonary ventilation
age and hemodynamic response to exercise, 222

Pulmonic valve
absence of, associated with double-outlet right ventricle, 452

Pulse
aortic pressure
assessment of aortic valvular stenosis from, 30
left ventricular pressure pulse
evaluation of the contractile state of the human heart from the first derivative of the apexcardiogram, 933

Pulsus alternans
mechanisms of, 372

Pyrogen
renal response to, in normotensive and hypertensive man, 553

Q

Quinidine
after myocardial infarction, 294
purging action of, potentiation of contraction coupling of basic electric rhythms, 173

R

Radioelectrocardiography
exercise test in coronary heart disease, 238
exercise test in diabetes, 245

Radioisotopes
measurement of glomerular filtration rate and effective renal plasma flow by iothalamate
measurement of pulmonary edema in valvular heart disease, 381
precipitation tests
cardiac diseases and psittacosis, 830

Radiological aspects
heart muscle disease in Nigerian adults, 460

Radiopaque media
vectorcardiographic changes during intracoronary injections, 63

Raynaud's disease
in children, 724

Renal arteries
blood flow
effect of artificial pacing on cardiac and renal function, 717
renal response to pyrogen in normotensive and hypertensive man, 553
stenosis
renal venous renin determinations in the diagnosis of surgically correctable hypertension, 942

Circulation, Volume XXXVI, December 1967
vascular lesions in infants with congenital rubella, 544

Renal hemodynamics
measurement of glomerular filtration rate and effective renal plasma flow by iothalamate and iodopyracet, 131F, 441

Renin plasma
prognostic value of plasma renin activity in renovascular hypertension, 570
renal venous renin determinations in diagnosis of surgically correctable hypertension, 942

Resepine
Raynaud's disease in children, 724

Respiration oxygen intake in mitral stenosis, 497
Resuscitation, cardiac
pulmonary air embolism during insertion of permanent transvenous cardiac pacemaker, 456
use of electrocardiophone, 975

Rheumatic carditis
acute termination of reciprocating tachycardia by atrial stimulation, 637
ultra low frequency force ballistocardiography in acute cardiomypathy, 92

Rhythm
reciprocal role of premature beats in initiation and termination of supraventricular tachycardia in Wolff-Parkinson-White syndrome, 644

Right ventricles
absence of pulmonic valve associated with double-outlet right ventricle, 452
hypertrophy ECG lead design, 320

Risk factors
coronary heart disease in women, 577
hyperglycemia in coronary heart disease, 609

Rubella syndrome
vascular lesions in infants with congenital rubella, 544

Rubidium indicator
myocardial blood flow in man as measured by coincidence counting system and a single bolus of #81RbCl, 187

S

Sarcoid carditis
ultra low frequency force ballistocardiography in acute cardiomypathy, 92

Scintillation studies
noradrenaline release and metabolism in orthostatic hypotension, 489

Seldinger technique
percutaneous femoral artery approach to selective coronary arteriography, 730

Septal defects
atrial. See Atrial septal defects
ventricular. See Ventricular septal defects

Septal excitation
incomplete left bundle-branch block, 261

Serological evidence
pericardial and myocardial disease associated with psittacosis, 830

Serum triglyceride
coronary disease in familial hypercholesterolemia, 77

Shock
blood pressure determination, 985
Diagnosis and Treatment of Shock (Weil and Shubin), 351

Shunts
thoracic duct-to-pulmonary vein
in treatment of experimental right heart failure, 539

Skin temperature
Raynaud's disease in children, 724

Smoking
coronary heart disease, study of risk factors in women, 577

Sodium
depletion antihypertensive properties of furosemide, 125

Sphygmomanometers
determination of blood pressure, 805
for indirect measurement of blood pressure, 980

Spleen
congenital cardiac disease associated with poly-splenia, 789

Starling's principle
mechanisms of pulsus alternans, 372

Stenosis
aortic valve stenosis, 480
idiopathic hypertrophic subaortic. See Idiopathic hypertrophic subaortic stenosis
muscular subaortic, 36
pulmonary
atrial flutter associated with isolated pulmonic stenosis, 313
vascular lesions in infants with congenital rubella, 544

renar artery
renal venous renin determinations in the diagnosis of surgically correctable hypertension, 942
vascular lesions in infants with congenital rubella, 544
valvular produced by active infective endocarditis, 449

Stimulation
beta-adrenergic evaluation of contractile state of human heart from first derivative of the apexcardiogram, 933

Stimulators
supraventricular tachycardia in Wolff-Parkinson-White syndrome, 644

Streptococcal vegetations
valvular stenosis produced by active infective endocarditis, 449

Stroke
analysis of cerebral metabolic disorder in, 197
cerebrovascular disease in the elderly, 394
identification of stroke-prone individuals, 394
therapy monitoring cerebral blood flow, oxygen, and glucose metabolism, 197

Stroke index
exercise in healed myocardial infarction, effect of nitroglycerin, 746

Stroke volume
assessment of aortic valvular stenosis from aortic pressure pulse, 30

ST-segment measurement
electrocardiographic changes in clinically normal older men following near maximal and maximal exercise, 5

Subclavian-pulmonary arterial anastomosis
postpartum death from congenital heart disease, 304

Sudden death
coronary disease in familial hypercholesterolemia, 77
Telangiectasis
diffuse tortuosity and lengthening of the arteries, 400

Tension time index
exercise in healed myocardial infarction, 734

Tetralogy of Fallot
absence of pulmonic valve associated with double-outlet right ventricle, 452
vascular changes in pulmonic stenosis and, studied in lung biopsies, 924

Thoracic duct-to-pulmonary vein shunt
in treatment of experimental right heart failure, 539

Thousand aviator study
systolic blood pressure, 812

Thromboplastin
atheromatous
couagulant and thrombogenic properties of human atheroma, 284

Thrombosis
artery occlusion in diabetics and nondiabetics with severe vascular disease, 83
couagulant and thrombogenic properties of human atheroma, 284
postpartum death from heart disease, 304

Thrombus
ball valve
myxoma of left atrium, 408
pulmonary
vascular changes in pulmonic stenosis and tetralogy of Fallot studied in lung biopsies, 924

Tilt test
for investigating neural component in hypotension, 387

Tolazoline
Raynaud’s disease in children, 724

Toxic-therapeutic ratio
prophylactic use of diphenyldantoin sodium, 119

Transposition of great vessels
truncal inversion with biventricular pulmonary trunk with aorta from right ventricle, 783

Tricuspid valve insufficiency
thoracic duct-to-pulmonary vein shunt in treatment of experimental right heart failure, 539

Triglycerides
relationship between hyperglycemia and myocardial infarction, 609
serum
corona disease in familial hypercholesterolemia, 77

Truncus
inversion with biventricular pulmonary trunk and aorta from right ventricle, 783

Tumors
myxoma of left atrium
simulating mitral insufficiency, 417
sudden tumor movement, 408
ventricular fibroma, 427

Two-step tests
comparison of double two-step test and maximal exercise treadmill test, 238
exercise electrocardiography, 517

U

Uremia
tall-upright T waves, 708

Urine
output of noradrenaline in orthostatic hypotension, 489
INDEX

V

Valves
malfunction
complication of valve replacement by caged-lens prosthesis, 422

Valvular heart disease
measurement of pulmonary edema, 381

Vascular disease
artery occlusion in diabetics and nondiabetics with severe vascular disease, 83
pulmonic stenosis and tetralogy of Fallot studied in fungi biopsies, 924

Vascular lesions
in infants with congenital rubella, 544

Vascular resistance
blood rheology studies, clinical implications, 148

Vascular wall

Vasoregulatory reactor
exercise electrocardiography, 517

Vasospastic disorders
Raynaud’s disease in children, 724

Vectorcardiography
analysis
during intracoronary injections, 63
cardiac potentials on body surface of infants with anomalous left coronary artery (myocardial infarction), 345
decision rules, 136
digital computer analysis of vectorcardiogram of newborn infants; measurement of three orthogonal lead systems, 906

Vegetations
streptococcal
valvular stenosis produced by active infective endocarditis, 449

Velocity of blood
evaluation of roentgen cinedensitometry for flow measurement in models and intact circulation, 951

Vena cava
congenital cardiac disease associated with polysplenia; developmental complex of bilateral “left-sidedness,” 789

Ventricles
absence of pulmonic valve associated with double-outlet right ventricle, 452
contractility
heart muscle disease in Nigerian adults, 460
incomplete left bundle-branch block, 261
diastolic gallop
calcified left atrial myxoma, 417
double-outlet right
truncal inversion with biventricular pulmonary trunk and aorta from right ventricle, 783
electrical stimulation of
diagnosis of ventricular tachycardia, 628
excitation
 cardiac potentials on body surface of infants with anomalous left coronary artery (myocardial infarction), 345
fibrillation
use of electrocardiophone, 810, 975

Hypertrophy
tall upright T waves in precordial leads, 708
pacing
role of tachycardia in mitral stenosis, 511
paroxysmal ventricular tachycardia
with rate-dependent coupling intervals, 255
performance
exercise in healed myocardial infarction, 734
pressure tracing
calcified left atrial myxoma simulating mitral insufficiency, 417
right
absence of pulmonic valve associated with double-outlet right ventricle, 452
computer search for ECG lead directions to optimize diagnostic differentiation, 320

Ventricular fibrillation
electrocardiophone for listening to, 810, 975

Ventricular septal defects
postpartum death from heart disease, 304

Vessels

Viscosity
blood rheology studies, clinical implications, 148

Viral myocarditis
ballistocardiography in acute cardiomyopathy, 92

Volume
angiography
mechanisms of pulus alternans, 372
left atrial
acute mitral regurgitation, 839
left ventricular
acute mitral regurgitation, 839
cineangiographic studies of left ventricle, 868

W

Wolff-Parkinson-White syndrome (WPW)
atrioventricular and ventriculooartial excitation, 663
supraventricular tachycardia in, 644
termination of reciprocating tachycardia by atrial stimulation, 637

Women
coronary heart disease, study of risk factors in women under 60 years of age, 577

Work capacity
cineangiographic studies of left ventricle in angina pectoris, 868

X

Xanthelasma
coronary disease in familial hypercholesterolemia, 77

Xanthoma
coronary disease in familial hypercholesteremia, 77

Xanthomata
present status of clofibrate (Atromid-S), 337

Y

Yield shear test
blood rheology studies, clinical implications, 148
