AUTHOR/SUBJECT INDEX TO
VOLUME 74

Cardiovascular Surgery 1985
Part II, Volume 74, Number 3, September 1986
Supplement I

Cardiovascular Surgery 1986
Part 2
Part II, Volume 74, Number 5, November 1986
Supplement III

Proceedings of the
1985 National Conference on Standards and Guidelines
for Cardiopulmonary Resuscitation and Emergency Cardiac Care
Part II, Volume 74, Number 6, December 1986
Supplement IV

AMERICAN HEART ASSOCIATION, INC.
Validation of continuous-wave Doppler echocardiographic measurements of mitral and tricuspid prosthetic valve gradients: a simultaneous Doppler-catheter study
Gerard T. Wilkins, Linda D. Gillam, Gordon L. Kritzer, Robert A. Levine, Igor F. Palacios, and Arthur E. Weyman

Measurement of regional wall motion from biplane contrast ventriculograms: a comparison of the 30 degree right anterior oblique and 60 degree left anterior oblique projections in patients with acute myocardial infarction

Regulation of plasma levels of low-density lipoprotein cholesterol: interpretation of data on low-density lipoprotein turnover in man
Jonathan B. Meddings and John M. Dietschy

THERAPY AND PREVENTION

The differential effects of positive inotropic and vasodilator therapy on diastolic properties in patients with congestive cardiomyopathy
John D. Carroll, Roberto M. Lang, Alexander L. Neumann, Kenneth M. Borow, and Sol I. Rajfer

LABORATORY INVESTIGATION

Histamine-induced coronary spasm in regions of intimal thickening in miniature pigs: roles of serum cholesterol and spontaneous or induced intimal thickening
Kensuke Egashira, Hitonobu Tomoike, Yasuke Yamamoto, Akira Yamada, Yasuo Hayashi, and Motoomi Nakamura

Synergism of thrombolytic agents in vivo
Désiré Collen, Jean-Marie Stassen, David C. Stump, and Marc Verstraete

Selective enhancement of function of stunned myocardium by increased flow
Lloyd D. Stahl, Thomas R. Aversano, and Lewis C. Becker

Quantification of myocardial infarct size by thallium-201 single-photon emission computed tomography: experimental validation in the dog
Florence Prigent, Jamshid Maddahi, Ernest V. Garcia, Yuichi Satoh, Kenneth Van Train, and Daniel S. Berman

Electrophysiology

Endocardial catheter mapping: validation of a cineradiographic method for accurate localization of left ventricular sites
Richard N. W. Hauer, Robert M. Heethaar, Michel T. W. de Zwart, Ruud N. van Dijk, Ingeborg v. d. Tweet, Cornelius Borst, and Etienne O. Robles de Medina

Effect of postganglionic vagal stimulation on the organization of atrioventricular nodal conduction in isolated rabbit heart tissue
Todor Mazgalev, Leonard S. Dreifus, Eric L. Michelson, and Amir Pelleg

The effects of doxorubicin on ventricular tachycardia
Herve le Marec, Walter Spinelli, and Michael R. Rosen

Ventricular Performance

Precision measurements of right and left ventricular volume by cine computed tomography
Steven J. Reiter, John A. Ruberger, Andrew J. Feiring, William Stanford, and Melvin L. Marcus

Phasic mitral blood flow and regional left ventricular dimensions: possible mechanism of active assist to ventricular filling
Brian G. Bertha and John D. Folts

Editorial correspondence — Burton E. Sobel, M.D., Editor, Washington University School of Medicine, 660 South Euclid Ave., Box 8055, St. Louis, Missouri 63110.

Business correspondence — regarding subscriptions, change of address, single copies, missing issues, author reprint orders, etc. — American Heart Association, 7320 Greenville Ave., Dallas, Texas 75231.

Advertising — Pharmaceutical Media, Inc., 130 Madison Ave., New York, NY 10016. Advertising space is given only to copy approved by a special committee of the American Heart Association. Forms close first day of month preceding date of issue. Advertising rates and page sizes on application.

Circulation (USPS 113720) is published twelve times a year at the Publications Office, American Heart Association, Dallas, Texas 75231.

Subscription rates — Annual subscriptions accepted at any time. Subscription rates for Japan and Europe are available through respective exclusive agents. All orders for Japan must go through Nankodo Co., Ltd., 42-6 Hongo-Chome, Bunkyo-Ku, Tokyo, Japan. All orders for Europe must go through Bailliere Tindall, 1 St. Anne’s Road, Eastbourne, East Sussex, BN21 3UN England.

$56 United States, $72 elsewhere (outside of Japan and Europe). Air mail rates available. Interns, residents, medical students $28 in the U.S., $36 in Canada and Mexico. A letter from department chairman verifying post held and completion date is required. Remittances for subscriptions outside Japan and Europe must be made by check, draft, post office or express money order in U.S. dollars payable to the American Heart Association. Issues will be sent once payment is received.

Second class postage paid at Dallas, Texas, and additional mailing offices. POSTMASTER: Send address changes to Circulation, American Heart Association, 7320 Greenville Ave., Dallas, Texas 75231. The Fulfillment Manager should be advised of change of address 30 days before date of issue with both the subscriber’s old and new addresses given.

AUTHOR INDEX*

NOTE
Committee and Special Reports are published in rear forms as part of AHA News. The reports follow text and are continued into rear ad pages.
Indexes to ABSTRACTS, AHA 59th Scientific Sessions, Supplement II, October 1986, are included in that issue.

SUBJECT INDEX*

A

Acetylcholine
Induction of coronary artery spasm by acetylcholine in patients with variant angina: possible role of the parasympathetic nervous system in the pathogenesis of coronary artery spasm, 955

Action potentials
The monophasic action potential upstroke: a means of characterizing local conduction, 1147

Adenosine
Adenosine-sensitive ventricular tachycardia: evidence suggesting cyclic AMP-mediated triggered activity, 270

Adolescence
Racial (black-white) comparisons of the relationship of levels of endogenous sex hormones to serum lipoproteins during male adolescence: the Bogalusa Heart Study, 1226

Ambulatory monitoring
The use of ambulatory monitoring in the prognostic evaluation of patients with sustained ventricular tachycardia treated with amiodarone, 1054

Amiodarone
Amiodarone versus amiodarone and a type IA agent for treatment of patients with rapid ventricular tachycardia, 1037
Effects of long-term treatment with amiodarone on exercise hemodynamics and left ventricular relaxation in patients with hypertrophic cardiomyopathy, 544
The use of ambulatory monitoring in the prognostic evaluation of patients with sustained ventricular tachycardia treated with amiodarone, 1054

Amrinone
Additive effects of dobutamine and amrinone on myocardial contractility and ventricular performance in patients with severe heart failure, 367
Effect of amrinone on right ventricular function: predominance of afterload reduction, 359

Amyl nitrite
T. Launder Brunton and amyl nitrite: a Victorian vasodilator, 222

Anesthesia
Perioperative hypertension in patients undergoing carotid endarterectomy: shorter duration under regional block anesthesia, I-1

Angina
Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675
Coronary angioplasty for early postinfarction unstable angina, 1365
Effects of propranolol and nifedipine on exercise-induced attack in patients with variant angina: assessment by exercise thallium-201 myocardial scintigraphy with quantitative rotational tomography, 374
Histologic evidence for small-vessel coronary artery disease in patients with angina pectoris and patent large coronary arteries, 964
Increased uptake of 18F-fluorodeoxyglucose in postschismic myocardium of patients with exercise-induced angina, 81
Local coronary supersensitivity to diverse vasoconstrictive stimuli in patients with variant angina, 1255
Preliminary experience with synchronized coronary sinus retroperfusion in humans, 381
Provocation of coronary spasm by dopamine in patients with active variant angina pectoris, 262
Resting angina with fixed coronary artery stenosis: nocturnal decline in ischemic threshold, 1248
Ten year survival after coronary artery bypass surgery for angina in patients aged 65 years and older, 509

Angioplasty
Changes in systemic vascular resistance detected by the arterial resistometer: preliminary report of a new method tested during percutaneous transluminal coronary angioplasty, 780
Coronary angioplasty for early postinfarction unstable angina, 1365
Coronary dissection and total coronary occlusion associated with percutaneous transluminal coronary angioplasty: significance of initial angiographic morphology of coronary stenosis, 1371
Early results of emergency surgery after coronary angioplasty, III-26

Prediction of long-term clinical outcome with final translesional pressure gradient during coronary angioplasty, 563
Prevention of ischemia during percutaneous transluminal coronary angioplasty by transcatheter infusion of oxygenated Fluosol DA 20%, 555
Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, 1-32
Value of intracoronary electrocardiogram to monitor myocardial ischemia during percutaneous transluminal coronary angioplasty, 330

Antioxidants
Influence of antioxidants (mannitol and allopurinol) on oxygen free radical generation during and after cardiopulmonary bypass, II-134

Aortic aneurysm
Late rupture after Dacron wrapping of aortic aneurysms, I-11
Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, I-32

Aortic disease
Extended aortic arch anastomosis for repair of coarctation in infancy, I-37
Surgery for coarctation of the aorta in the neonate, I-25

Aortic insufficiency
Aortic valve insufficiency due to aortic dilatation: correction by sinus rim adjustment, I-136

Aortic stenosis
Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675
Aortic valvuloplasty for acquired aortic stenosis, I-130
Balloon dilatation of calcific aortic stenosis in elderly patients: post-mortem, intraoperative, and percutaneous valvuloplasty studies, 119
Flow in the aorta and patent ductus arteriosus in infants with aortic atresia or aortic stenosis: a pulsed Doppler ultrasound study, 315

Arrhythmia
Ablation of cardiac tissues by an electrode catheter technique for treatment of ectopic supraventricular tachycardia in adults, 1044
Amiodarone versus amiodarone and a type IA agent for treatment of patients with rapid ventricular tachycardia, 1037
The effect of chemical ablation of the endocardium on ventricular fibrillation threshold, 645
The effects of doxorubicin on ventricular tachycardia, 881
Effects of incremental doses of procainamide on ventricular refractoriness, intraventricular conduction, and induction of ventricular tachycardia, 1355
Endocardial catheter mapping: wire skeleton technique for representation of computed arrhythmogenic sites compared with intraoperative mapping, 1346
High-frequency analysis of the surface electrocardiograms of patients with supraventricular tachycardia: accurate identification of atrial activation and determination of the mechanism of tachycardia, 1016
The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518
Modulated parasystole originating in the sinoatrial node, 945
The preexcitation index: an aid in determining the mechanism of supraventricular tachycardia and locating accessory pathways, 493
Prognostic significance of ventricular tachycardia and fibrillation induced at programmed stimulation and delayed potentials detected on the signal-averaged electrocardiograms of survivors of acute myocardial infarction, 731
Resetting response patterns during sustained ventricular tachycardia: relationship to the excitable gap, 722
Simultaneous recording of action potentials from endocardium and epicardium during ischemia in the isolated cat ventricle: relation of temporal electrophysiologic heterogeneities to arrhythmias, 401
Treatment of ventricular arrhythmias after myocardial infarction, 653

Arrhythmogenicity
Histologic changes and arrhythmogenicity after discharge through transeptal catheter electrode, 637

Arterial wall
Intimal plus medial thickness of the arterial wall: a direct measurement with ultrasound imaging, 1399

*Roman numbers indicate articles published in supplements.

Vol. 74, July-December 1986 1453
Aspirin
Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21

Atherosclerosis
The use of frequency histograms of ultrasonic backscatter amplitudes for detection of atherosclerosis in vitro, 1093

Atrial flutter
Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of d-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

Atrial tissue
Myosin isoenzyme distribution in overloaded human atrial tissue, 477

Atrioventricular canal
Prognostic factors and surgical treatment of partial atrioventricular canal, I-42

B

β-Adrenergic receptors
Assessment of the β-adrenergic receptor pathway in the intact failing human heart: progressive receptor down-regulation and subsensitivity to agonist response, 1290

Blacks
Blacks in the Coronary Artery Surgery Study: risk factors and coronary artery disease, 64

β-Blockade
Effects of selective and nonselective β-adrenergic blockade on mechanisms of exercise conditioning, 664

Hemodynamic-inotropic response to a β-blocker with intrinsic sympathomimetic activity in patients with congestive cardiomyopathy, 1390

The renal, forearm, and hormonal responses to standing in the presence and absence of propranolol, 1061

Blood flow
Arterial-venous relationships in the human left ventricular myocardium: anatomic basis for countercurrent regulation of blood flow, 1195

Comparison of multiple views for the evaluation of pulmonary arterial blood flow by Doppler echocardiography, 1002

Comparison of perioperative and postoperative phasic blood flow in aortocoronary venous bypass grafts by means of pulsed Doppler echocardiography with implantable microprobes, 3-61

Effect of coronary stenotic lesions on regional myocardial blood flow at rest, 746

Evaluation of human coronary blood flow with an 80 channel, 20 MHz pulsed Doppler velocimeter and zero-cross and Fourier transform methods during cardiac surgery, III-53

Failure to augment maximal limb blood flow in response to one-leg versus two-leg exercise in patients with severe heart failure, 245

The immediate effects of isohexol on coronary blood flow and myocardial function in vivo, 1416

Interrelationship of mid-diastolic mitral valve motion, pulmonary venous flow, and transmitral flow, 36

Noninvasive evaluation of left ventricular performance based on peak aortic blood acceleration measured with a continuous-wave Doppler velocity meter, 323

Phasic mitral blood flow and regional left ventricular dimensions: possible mechanism of active assist to ventricular filling, 901

Regional myocardial volume perfused by the coronary artery branch: estimation in vivo, 157

Selective enhancement of function of stunned myocardium by increased flow, 843

Sympathetic reflex control of skeletal muscle blood flow in patients with congestive heart failure: evidence for β-adrenergic circulatory control, 929

Blood viscosity
Effect of a reduction in blood viscosity on maximal myocardial oxygen delivery distal to a moderate coronary stenosis, 1085

Body surface mapping
Characterization of the spatial distribution of late ventricular potentials by body surface mapping in patients with ventricular tachycardia, 1323

Mapping of the body surface potential in patients with the idiopathic long QT syndrome, 1334

The role of initial minimum potentials on body surface maps in predicting the site of accessory pathways in patients with Wolff-Parkinson-White syndrome, 89

Brunton, T. Lauder
T. Lauder Brunton and amyl nitrite: a Victorian vasodilator, 222

C

Calcitonin gene-related peptide
Calcitonin gene-related peptide: a potent dilator of human epicardial coronary arteries, 1245

Calcium antagonists
Comparative effects of nicardipine, a new calcium antagonist, on size of myocardial infarction after coronary artery occlusion in dogs, 420

Frequency-dependent effects of calcium antagonists on atrioventricular conduction and refractoriness: demonstration and characterization in anesthetized dogs, 1156

Cardiac arrest
Arteriovenous carbon dioxide and pH gradients during cardiac arrest, 1071

Vest inflation without simultaneous ventilation during cardiac arrest in dogs: improved survival from prolonged cardiopulmonary resuscitation, 1407

Cardiac conduction
Evolution of a hereditary cardiac conduction and muscle disorder: a study involving a family with six generations affected, 21

Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of d-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

Use-dependent effects of lidocaine on conduction in canine myocardium: application of the modulated receptor hypothesis in vivo, 205

Cardiac output
Maintenance of cardiac output with normal filling pressures in patients with dilated heart failure, 1303

Cardiac tamponade
The shift in the relationship between intrapericardial fluid pressure and volume induced by acute left ventricular pressure overload during cardiac tamponade, 173

Cardiac transplantation
Cardiac transplantation, 913

Early function of cardiac homografts: relationship to hemodynamics in the donor and length of the ischemic period, III-77

Magnetic resonance imaging of cardiac transplants: the evaluation of rejection of cardiac allografts with and without immunosuppression, 145

Noninvasive monitoring of cardiac allograft rejection by intramyocardial electrodegram recordings, III-72

Preservation of donor heart function and high-energy stores by continuous perfusion with synthetic plasma at 22°C, III-80

Reversal of cardiac transplant rejection without massive immunosuppression, III-68

Cardiogenic shock
Surgical treatment of cardiogenic shock after myocardial infarction, III-11

Cardiomyopathy
The differential effects of positive inotropic and vasodilator therapy on diastolic properties in patients with congestive cardiomyopathy, 815

Evolution of a hereditary cardiac conduction and muscle disorder: a study involving a family with six generations affected, 21

Hemodynamic-inotropic response to a β-blocker with intrinsic sympathomimetic activity in patients with congestive cardiomyopathy, 1390

Time variation of mitral regurgitant flow in patients with dilated cardiomyopathy, 684

Cardioplegia
The efficacy of blood versus crystalloid sinus cardioplegia during global myocardial ischemia, III-99

Enhancement of cardioplegic protection with the free-radical scavenger peroxidase, III-138
Late postoperative ventricular function after blood and crystalloid cardioplegia, III-89
Regional myocardial protection by retrograde coronary sinus infusion of cardiopleic solution, III-16
Retrograde coronary sinus versus aortic root perfusion with cold cardioplegia: a randomized study of levels of cardiac enzymes in 40 patients, III-105

Cardiopulmonary bypass
Influence of antioxidants (mannitol and allopurinol) on oxygen free radical generation during and after cardiopulmonary bypass, III-134
Oxygen free radical generation during cardiopulmonary bypass: correlation with complement activation, III-130
Platelet size and mass as an indicator for platelet transfusion after cardiopulmonary bypass, III-153

Cardiopulmonary resuscitation
Absence of improvement in resuscitation from ventricular fibrillation by sodium bicarbonate in dogs, IV-75
Acute myocardial infarction: state of the art, IV-120
Advanced pediatric life support: state of the art, IV-124
Alternative approaches to external chest compression, IV-98
Alternative methods of ventilation during respiratory and cardiac arrest, IV-63
Arteriovenous carbon dioxide and pH gradients during cardiac arrest, 1071
Calcium-channel blockers and advanced cardiac life support, IV-94
Calcium: limited indications, some danger, IV-90
Cardiopulmonary resuscitation: beyond cardiac massage, 443
Cardiopulmonary resuscitation and hypothermia, IV-29
Cardiopulmonary resuscitation with interposed abdominal compression, IV-37
Cardiovascular pharmacology I, IV-70
Cardiovascular pharmacology II: the use of catecholamines, pressor agents, digitalis, and corticosteroids in CPR and emergency cardiac care, IV-80
Cardiovascular pharmacology III: atropine, calcium, calcium blockers, and β-blockers, IV-86
Cerebral resuscitation after cardiac arrest: a review, IV-138
Continuous external counterpressure during closed-chest resuscitation: a critical appraisal of the military antishock tourniquet garment and abdominal binder, IV-102
Defibrillation performed by the emergency medical technician, IV-9
Education and evaluation in emergency cardiac care programs (CPR and advanced cardiac life support): state of the art, IV-18
Electrical therapy for cardiovascular emergencies, IV-111
Emergency medical service systems in acute cardiac care: state of the art, IV-4
Energy requirements for defibrillation, IV-117
External compression without adjuncts, IV-33
Foreign body airway obstruction: considerations in 1985, IV-60
The influence of manual chest compression rate on hemodynamic support during cardiac arrest: high-impulse cardiopulmonary resuscitation, IV-51
Management of paroxysmal supraventricular tachycardia, IV-108
Modifications of cardiopulmonary resuscitation based on the cough, IV-42
Near drowning, IV-27
A needs assessment of advanced life support and emergency medical services in the pediatric patient: state of the art, IV-129
The role of the esophageal obturator airway in cardiopulmonary resuscitation, IV-134
Special considerations for defibrillation performed by emergency medical technicians in small communities, IV-13
Special resuscitation situations: near drowning, traumatic injury, electric shock, and hypothermia, IV-23
Standards and guidelines for cardiopulmonary resuscitation and emergency cardiac care, IV-1
Teaching and credentialing the physically challenged: state of the art. A review of change in the clinical and scientific data since 1980, IV-66
Vest inflation without simultaneous ventilation during cardiac arrest in dogs: improved survival from prolonged cardiopulmonary resuscitation, 1407

Cardioversion
The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518

Catecholamines
Characteristics of initiation and termination of catecholamine-induced triggered activity in atrial fibers of the coronary sinus, 1168

Catheter ablation
Ablation of cardiac tissues by an electrode catheter technique for treatment of ectopic supraventricular tachycardia in adults, 1044

Chemical ablation
The effect of chemical ablation of the endocardium on ventricular fibrillation threshold, 645

Cholesterol
High-density lipoprotein cholesterol and coronary heart disease in hypercholesterolemic men: The Lipid Research Clinics Coronary Primary Prevention Trial, 1217
Histamine-induced coronary spasm in regions of intimal thickening in miniature pigs: roles of serum cholesterol and spontaneous or induced intimal thickening, 826
Regulation of plasma levels of low-density lipoprotein cholesterol: interpretation of data on low-density lipoprotein turnover in man, 805

Chordae tendineae
The effect of preservation of chordae tendineae in mitral valve replacement for postinfarction mitral regurgitation, I-116

Clinical trials
Beyond randomized clinical trials: applying clinical experience in the treatment of patients with coronary artery disease, 1191
Optimal detection of the progression of coronary artery disease: comparison of methods suitable for risk factor intervention trials, 1225

Coarctation
Extended aortic arch anastomosis for repair of coarctation in infancy, I-37
Surgery for coarctation of the aorta in the neonate, I-25
Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, I-32

Collateral circulation
Limitation of myocardial ischemia by collateral circulation during sudden controlled coronary artery occlusion: a prospective study, 469

Complemet activation
Oxygen free radical generation during cardiopulmonary bypass: correlation with complement activation, III-130

Conduction
Effect of postganglionic vagal stimulation on the organization of atrioventricular nodal conduction in isolated rabbit heart tissue, 869
Effects of incremental doses of procainamide on ventricular refractoriness, intravenous conduction, and induction of ventricular tachycardia, 1355
The effects of procainamide on conduction in anisotropic canine ventricular myocardium, 616
Frequency-dependent effects of calcium antagonists on atrioventricular conduction and refractoriness: demonstration and characterization in anesthetized dogs, 1156
The monophasic action potential upstroke: a means of characterizing local conduction, 1147

Congenital heart disease
Color Doppler detection of multiple ventricular septal defects, 1317
Does prostacyclin enhance the selective pulmonary vasodilator effect of oxygen in children with congenital heart disease? 135
Extended aortic arch anastomosis for repair of coarctation in infancy, I-37
Flow in the aorta and patent ductus arteriosus in infants with aortic stenosis or aortic septum: a pulsed Doppler ultrasound study, 315
Long-term results in surgical treatment of children 4 years old or younger with coronary involvement due to Kawasaki disease, I-77
Prognostic factors and surgical treatment of partial atrioventricular canal, I-42
Surgery for coarctation of the aorta in the neonate, I-25
Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, I-32
Up to 7 years of follow-up after two-stage anatomic correction of simple transposition of the great arteries, I-47

Congestive heart failure
Additive effects of dobutamine and amrinone on myocardial contrac-
Coronary artery disease
Association of levels of lipoprotein Lp(a), plasma lipids, and other lipoproteins with coronary artery disease documented by angiography, 758
Beyond randomized clinical trials: applying clinical experience in the treatment of patients with coronary artery disease, 1191
Blacks in the Coronary Artery Surgery Study: risk factors and coronary artery disease, 64
The influence of surgery on the natural history of angiographically documented left ventricular aneurysm: the Coronary Artery Surgery Study, 110

Coronary artery surgery
Bypass surgery from the internal mammary artery graft: a 15 year follow-up, III-30
Extended use of the internal mammary artery graft: important anatomic and physiologic considerations, III-42
Perioperative risk of bilateral internal mammary artery after artery grafting: analysis of 500 cases from 1971 to 1984, III-37
Ten year survival after coronary artery bypass surgery for angina in patients aged 65 years and older, 509
The role of coronary bypass surgery for 'left main equivalent' coronary disease: the Coronary Artery Surgery Study Registry, III-17
Use of internal-mammary artery grafts for multiple coronary artery bypasses, III-48

Coronary dissection
Coronary dissection and total coronary occlusion associated with percutaneous transluminal coronary angioplasty: significance of initial angiographic morphology of coronary stenosis, 1371

Coronary occlusion
Effect of a reduction in blood viscosity on maximal myocardial oxygen delivery distal to a moderate coronary stenosis, 1085
ST segment response to acute coronary occlusion: coronary hemodynamic and angiographic determinants of direction of ST segment shift, 973

Coronary spasm
Histamine-induced coronary spasm in regions of intimal thickening in miniature pigs: role of serum cholesterol and spontaneous or induced intimal thickening, 826
Induction of coronary artery spasm by acetylcholine in patients with variant angina: possible role of the parasympathetic nervous system in the pathogenesis of coronary artery spasm, 955
Provocation of coronary spasm by dopamine in patients with active variant angina pectoris, 262

Coronary syndromes
Anatomic-physiologic links between acute coronary syndromes, 6
Creatine kinase
Diagnostic changes in plasma creatine kinase isozymes early after the onset of acute myocardial infarction, 105
Early detection of myocardial reperfusion by assay of plasma MM-creatine kinase isozymes in dogs, 567
Cyclic AMP
Adenosine-sensitive ventricular tachycardia: evidence suggesting cyclic AMP-mediated triggered activity, 270

Defibrillation
The potential gradient field created by epicardial defibrillation electrodes in dogs, 626

Dipyridamole
Prevention of myocardial platelet deposition and thromboxane release with dipyridamole, III-145

Dobutamine
Additive effects of dobutamine and amrinone on myocardial contractility and ventricular performance in patients with severe heart failure, 367

Dopamine
Provocation of coronary spasm by dopamine in patients with active variant angina pectoris, 262

Doxorubicin
The effects of doxorubicin on ventricular tachycardia, 881

Echocardiography
Changes in intracardiac blood flow velocities and right and left ventricular stroke volumes with gestational age in the normal human fetus: a prospective Doppler echocardiographic study, 1208
Color Doppler detection of multiple ventricular septal defects, 1317
Comparison of multiple views for the evaluation of pulmonary arterial blood flow by Doppler echocardiography, 1002
Comparison of perioperative and postoperative phasic blood flow in aorticcoronary venous bypass grafts by means of pulsed Doppler echocardiography with implantable microprobes, III-61
Continuous-wave Doppler echocardiographic detection of pulmonary regurgitation and its application to noninvasive estimation of pulmonary artery pressure, 484
Direct measurement of inner and outer wall thickening dynamics with epicardial echocardiography, 164
Evaluation of human coronary blood flow with an 80 channel, 20 MHz pulsed Doppler velocimeter and zero-cross and Fourier transform methods during cardiac surgery, III-53
Flow in the aorta and patent ductus arteriosus in infants with aortic atresia or aortic stenosis: a pulsed Doppler ultrasound study, 315
The influence of preload and heart rate on Doppler echocardiographic indexes of left ventricular performance: comparison with invasive indexes in an experimental preparation, 181
Intraoperative echocardiography for the evaluation of valvular regurgitation: experience in 263 patients, I-143
Noninvasive evaluation of left ventricular performance based on peak aortic blood acceleration measured with a continuous-wave Doppler velocity meter, 323
Quantitation of mitral regurgitation by Doppler echocardiography, 306
The shift in the relationship between intracardiac fluid pressure and volume induced by acute left ventricular pressure overload during cardiac tamponade, 173
Validation of continuous-wave Doppler echocardiographic measurements of mitral and tricuspid prosthetic valve gradients: a simultaneous Doppler-catheter study, 786

Editorials
Anatomic-physiologic links between acute coronary syndromes, 6
Beyond randomized clinical trials: applying clinical experience in the treatment of patients with coronary artery disease, 1191
Cardiology 1985: 'Whither are we tending and what ought our aim to be?' Presidential Address, 449

Electrocardiography
High-frequency analysis of the surface electrocardiograms of patients with supraventricular tachycardia: accurate identification of atrial activation and determination of the mechanism of tachycardia, 1016
Value of intracoronary electrocardiogram to monitor myocardial ischemia during percutaneous transluminal coronary angioplasty, 330

Electrophysiology
Adenosine-sensitive ventricular tachycardia: evidence suggesting cyclic AMP-mediated triggered activity, 270
Characteristics of initiation and termination of catecholamine-induced triggered activity in atrial fibers of the coronary sinus, 1168
The effect of chemical ablation of the endocardium on ventricular fibrillation threshold, 645
Effect of postganglionic vagal stimulation on the organization of atrioventricular nodal conduction in isolated rabbit heart tissue, 869
The effects of procainamide on conduction in anisotropic canine ventricular myocardium, 616
Endocardial catheter mapping: validation of a cineradiographic method for accurate localization of left ventricular sites, 862
Frequency-dependent effects of calcium antagonists on atrioventricular conduction and refactoriness: demonstration and characterization in anesthetized dogs, 1156
Histologic changes and arrhythmogenicity after discharge through transseptal catheter electrode, 637
Late potentials detected after myocardial infarction: natural history and prognostic significance, 1280
The monophasic action potential upstroke: a means of characterizing local conduction, 1147
The potential gradient field created by epicardial defibrillation electrodes in dogs, 626
The role of initial minimum potentials on body surface maps in predicting the site of accessory pathways in patients with Wolf-Parkinson-White syndrome, 89
Simultaneous recording of action potentials from endocardium and epicardium during ischemia in the isolated cat ventricle: relation of temporal electrophysiologic heterogeneities to arrhythmias, 401
Vector mapping of myocardial activation, 603

Endarterectomy
Perioperative hypertension in patients undergoing carotid endarterectomy: shorter duration under regional block anesthesia, 1-1
Endocardial catheter mapping
Endocardial catheter mapping: wire skeleton technique for representation of computed arrhythmogenic sites compared with intraoperative mapping, 1346
Enzyme Isoforms
Diagnostic changes in plasma creatine kinase isosforms early after the onset of acute myocardial infarction, 105
Exercise
Effects of propranolol and nifedipine on exercise-induced attack in patients with variant angina: assessment by exercise thallium-201 myocardial scintigraphy with quantitative rotational tomography, 374

Endurance training in rats with chronic heart failure induced by myocardial infarction, 431
Failure to augment maximal limb blood flow in response to one-leg versus two-leg exercise in patients with severe heart failure, 245
Features of the exercise test that reflect the activity of ischemic heart disease out of hospital, 72
Improvement of left ventricular contractile function by exercise training in patients with coronary artery disease, 350
Inhibition of platelet aggregability by moderate-intensity physical exercise: a randomized clinical trial in overweight men, 939
Predictive value of the exercise tolerance test for mortality in North American men: the Lipid Research Clinics Mortality Follow-up Study, 252

F
Family history
Family history of heart attack: a modifiable risk factor? 239
Fetal physiology
Changes in intracardiac blood flow velocities and right and left ventricular stroke volumes with gestational age in the normal human fetus: a prospective Doppler echocardiographic study, 1208
Fibrinolysis
Assessment of fibrin degradation products during fibrinolytic therapy for acute myocardial infarction, 1027
18F-Fluorodeoxyglucose
Increased uptake of 18F-fluorodeoxyglucose in postischemic myocardium of patients with exercise-induced angina, 81
Fluosol
Prevention of ischemia during percutaneous transluminal coronary angioplasty by transcatheter infusion of oxygenated Fluosol DA 20%, 555
Fontan procedure
Left ventricular wall stress and contractile function in childhood: normal values and comparison of Fontan versus palliation only in patients with tricuspid atresia, 1-61
Free radicals
Free radicals and myocardial injury: pharmacologic implications, 1

G
GdDTPA
Magnetic resonance imaging of acute myocardial infarction: gadolinium diethylenetriamine pentaacetic acid as a marker of reperfusion, 1434
Gender
Gender, cardiology, and optimal medical care, 917

H
Heart failure
Assessment of the β-adrenergic receptor pathway in the intact failing human heart: progressive receptor down-regulation and subsensitivity to agonist response, 1290
Preservation of glomerular filtration rate in human heart failure by activation of the renin-angiotensin system, 766
Rapid ventricular pacing in the dog: pathophysologic studies of heart failure, 1075
Vasodilatory behavior of skeletal muscle arterioles in patients with nonedematous chronic heart failure, 775
Hemodynamics
Effects of long-term treatment with amiodarone on exercise hemodynamics and left ventricular relaxation in patients with hypertrophic cardiomyopathy, 544
Hemodynamic predictors of outcome in patients undergoing valve replacement, 1309
Heparin
Enhancement of thrombolysis with tissue-type plasminogen activator by pretreatment with heparin, 583
Histamine
Histamine-induced coronary spasm in regions of intimal thickening in miniature pigs: roles of serum cholesterol and spontaneous or induced intimal thickening, 826

SUBJECT INDEX
Vol. 74, July-December 1986
1457
Hypertension
Impaired responsiveness of the ventricular sensory receptor in hypertensive patients with left ventricular hypertrophy, 980
Perioperative hypertension in patients undergoing carotid endarterectomy: shorter duration under regional block anesthesia, I-1
Ventricular/vascular interaction in patients with mild systemic hypertension and normal peripheral resistance, 455

Hypertrophic cardiomyopathy
Does verapamil improve left ventricular relaxation in patients with myocardial hypertrophy? 530
Effects of long-term treatment with amiodarone on exercise hemodynamics and left ventricular relaxation in patients with hypertrophic cardiomyopathy, 544

Hypertrophy
Impaired responsiveness of the ventricular sensory receptor in hypertensive patients with left ventricular hypertrophy, 980

Hypoplastic left heart syndrome
Analysis of potential anatomic or physiologic determinants of outcome of palliative surgery for hypoplastic left heart syndrome, I-70

I

Immunosuppression
Magnetic resonance imaging of cardiac transplants: the evaluation of rejection of cardiac allografts with and without immunosuppression, 145
Reversal of cardiac transplant rejection without massive immunosuppression, III-68

Implantable cardioverter
The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518

Infarct size
Reduction in experimental infarct size by recombinant human superoxide dismutase: insights into the pathophysiology of reperfusion injury, 1424
Scintigraphic quantification of myocardial necrosis in patients after intravenous injection of myosin-specific antibody, 501

Integrated backscatter
Sensitive detection of the effects of reperfusion on myocardium by ultrasonic tissue characterization with integrated backscatter, 389

Internal mammary artery
Bypass surgery with the internal mammary artery graft: a 15 year follow-up, III-30
Extended use of the internal mammary artery graft: important anatomic and physiologic considerations, III-42
Perioperative risk of bilateral internal mammary after artery grafting: analysis of 500 cases from 1971 to 1984, III-37
Use of internal mammary artery grafts for multiple coronary artery bypasses, III-48

Intraventricular tunnel
Intraventricular tunnel repair for Taussig-Bing heart and related cardiac anomalies, I-53

Iohexol
The immediate effects of iohexol on coronary blood flow and myocardial function in vivo, 1416

Ischemia
Acute spinal cord ischemia: prevention of paraplegia with verapamil, I-5
Changes in systemic vascular resistance detected by the arterial resistometer: preliminary report of a new method tested during percutaneous transluminal coronary angioplasty, 780
Characterization of posts ischemic myocardial oxygen utilization, III-125
Delays of lethal cell injury in ischemic myocardium by preconditioning with ischaemia, 1124
Features of the exercise test that reflect the activity of ischemic heart disease out of hospital, 72
Iodine 123-phenylpentadecanoic acid myocardial scintigraphy: usefulness in the identification of myocardial ischemia, 1007
Limitation of myocardial ischemia by collateral circulation during sudden controlled coronary artery occlusion: a prospective study, 469
Prevention of ischemia during percutaneous transluminal coronary angioplasty by transcather infusion of oxygenated Fluosol DA 20%, 555
Selective enhancement of function of stunned myocardium by increased flow, 843
Simultaneous recording of action potentials from endocardium and epicardium during ischemia in the isolated cat ventricle: relation of temporal electrophysiologic heterogeneities to arrhythmias, 401
Value of the intracoronary electrocardiogram to monitor myocardial ischemia during percutaneous transluminal coronary angioplasty, 330

Isoenzymes
Myosin isoenzyme distribution in overloaded human atrial tissue, 477

K

Kawasaki disease
Long-term results in surgical treatment of children 4 years old or younger with coronary involvement due to Kawasaki disease, I-77

L

Late potentials
Characterization of the spatial distribution of late ventricular potentials by body surface mapping in patients with ventricular tachycardia, 1323
Late potentials detected after myocardial infarction: natural history and prognostic significance, 1280

Lidocaine
Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of d-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197
Use-dependent effects of lidocaine on conduction in canine myocardium: application of the modulated receptor hypothesis in vivo, 205

Lipid Research Clinics
Predictive value of the exercise tolerance test for mortality in North American men: the Lipid Research Clinics Mortality Follow-up Study, 252

Lipoproteins
Association of levels of lipoprotein Lp(a), plasma lipids, and other lipoproteins with coronary artery disease documented by angiography, 758
High-density lipoprotein cholesterol and coronary heart disease in hypercholesterolemic men: The Lipid Research Clinics Coronary Primary Prevention Trial, 1217
Racial (black-white) comparison of the relationship of levels of endogenous sex hormones to serum lipoproteins during male adolescence: the Bogalusa Heart Study, 1226
Regulation of plasma levels of low-density lipoprotein cholesterol: interpretation of data on low-density lipoprotein turnover in man, 805

Long QT syndrome
Mapping of the body surface potential in patients with the idiopathic long QT syndrome, 1334

Ludwig C
Carl Ludwig and the Leipzig Physiological Institute: 'a factory of new knowledge’, 920

M

Magnetic resonance imaging
Magnetic resonance imaging of cardiac transplants: the evaluation of rejection of cardiac allografts with and without immunosuppression, 145
Magnetic resonance imaging of acute myocardial infarction: gadolinium diethylenetriamine pentaacetic acid as a marker of reperfusion, 1434

Mapping
Endocardial catheter mapping: validation of a cineradiographic method for accurate localization of left ventricular sites, 862
Vector mapping of myocardial activation, 603
Metabolism
Identification of impaired metabolic reserve by atrial pacing in patients with significant coronary artery stenosis, 281

Mitral incompetence
Long-term results of valve repair in children with acquired mitral valve incompetence, 1-104

Mitral regurgitation
Mitral valve repair for mitral regurgitation secondary to coronary artery disease, 1-88
Quantitation of mitral regurgitation by Doppler echocardiography, 306
The effect of preservation of chordae tendineae in mitral valve replacement for postinfarction mitral regurgitation, 1-116
Time variation of mitral regurgitant flow in patients with dilated cardiomyopathy, 684

Mitral valve motion
Interrelationship of mid-diastolic mitral valve motion, pulmonary venous flow, and transmural flow, 36

Mitral valve reconstruction
Long-term follow-up after mitral valve reconstruction: incidence of postoperative left ventricular outflow obstruction, 1-99
Results of mitral valve reconstruction, 1-82

Mortality
Predictive value of the exercise tolerance test for mortality in North American men: the Lipid Research Clinics Mortality Follow-up Study, 252

Myocardial activation
Vector mapping of myocardial activation, 603

Myocardial dysfunction
Assessment of ischemic regional myocardial dysfunction and its reversibility, 1186

Myocardial infarction
Antithrombotic therapy for acute myocardial infarction: mechanisms and prevention of deep venous, left ventricular, and coronary artery thromboembolism, III-1
Assessment of fibrin degradation products during fibrinolytic therapy for acute myocardial infarction, 1027
Clinical and prognostic importance of persistent precordial (V1-V4) electrocardiographic ST segment depression in patients with inferior or transmural myocardial infarction, 56
Comparative effects of nicardipine, a new calcium antagonist, on size of myocardial infarction after coronary artery occlusion in dogs, 420
Coronary angioplasty for early postinfarction unstable angina, 1365
Coronary thrombolysis with recombinant single-chain urokinase-type plasminogen activator in patients with acute myocardial infarction, 1066
Delays of lethal cell injury in ischemic myocardium by preconditioning with ischemia, 1124
Diagnostic changes in plasma creatine kinase isozymes early after the onset of acute myocardial infarction, 105
Endurance training in rats with chronic heart failure induced by myocardial infarction, 431
Late potentials detected after myocardial infarction: natural history and prognostic significance, 1280
Left ventricular remodeling after myocardial infarction: a corollary to infarct expansion, 693
Magnetic resonance imaging of acute myocardial infarction: gadolinium diethylene triamine pentaacetic acid as a marker of reperfusion, 1434
Measurement of regional wall motion from biplane contrast ventriculograms: a comparison of the 30 degree right anterior oblique and 60 degree left anterior oblique projections in patients with acute myocardial infarction, 796
Myocardial infarction in young patients: an analysis by age subsets, 712
Postinfarction ventricular septal rupture: the importance of location of infarction and right ventricular function in determining survival, 45
Prognostic significance of ventricular tachycardia and fibrillation induced at programmed stimulation and delayed potentials detected on the signal-averaged electrocardiograms of survivors of acute myocardial infarction, 731
Quantification of myocardial infarct size by thallium-201 single-photon emission computed tomography: experimental validation in the dog, 852
Quantitative analysis of myocardial infarct structure in patients with ventricular tachycardia, 1266
Reduction in experimental infarct size by recombinant human superoxide dismutase: insights into the pathophysiology of reperfusion injury, 1424
Risk stratification for 1 year survival based on characteristics identified in the early hours of acute myocardial infarction. The Western Washington Intracoronary Streptokinase Trial, 703
Scintigraphic quantification of myocardial necrosis in patients after intravenous injection of myosin-specific antibody, 501
The subendocardial border zone during acute ischemia of the rabbit heart: an electrophysiologic, metabolic, and morphologic correlative study, 1137
Surgical treatment of cardiogenic shock after myocardial infarction, III-11
Treatment of ventricular arrhythmias after myocardial infarction, 653

Myocardial injury
Free radicals and myocardial injury: pharmacologic implications, 1

Myocardial relaxation
Myocardial relaxation and passive diastolic properties in man, 991

Myocardial stiffness
Effects of nifedipine on intrinsic myocardial stiffness in man, 126

Myosin
Myosin isoenzyme distribution in overloaded human atrial tissue, 477
Scintigraphic quantification of myocardial necrosis in patients after intravenous injection of myosin-specific antibody, 501

Nicardipine
Comparative effects of nicardipine, a new calcium antagonist, on size of myocardial infarction after coronary artery occlusion in dogs, 420

Nifedipine
Effects of nifedipine on intrinsic myocardial stiffness in man, 126
Effects of propranolol and nifedipine on exercise-induced attack in patients with variant angina: assessment by exercise thallium-201 myocardial scintigraphy with quantitative rotational tomography, 374
Nitrates
Tolerance to organic nitrates, 1181

Nitroglycerin
Altered spectrum of nitroglycerin action in long-term treatment: nitroglycerin-specific venous tolerance with maintenance of arterial vasodepressor potency, 573

Nuclear imaging
Iodine 123–phenylpentadecanoic acid myocardial scintigraphy: usefulness in the identification of myocardial ischemia, 1007

Oxygen delivery
Effect of a reduction in blood viscosity on maximal myocardial oxygen delivery distal to a moderate coronary stenosis, 1085

Oxygen free radicals
Influence of antioxidants (mannitol and allopurinol) on oxygen free radical generation during and after cardiopulmonary bypass, III-134
Oxygen free radical generation during cardiopulmonary bypass: correlation with complement activation, III-130

Oxygen utilization
Characterization of postischemic myocardial oxygen utilization, III-125

Pacing
Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675
The effects of procainamide on conduction in anisotropic canine ventricular myocardium, 616

Prognosis
Clinical and prognostic importance of persistent precordial ($V_1$, $V_2$) electrocardiographic ST segment depression in patients with inferior or transmural myocardial infarction, 56

Programmed stimulation
Prognostic significance of ventricular tachycardia and fibrillation induced at programmed stimulation and delayed potentials detected on the signal-averaged electrocardiograms of survivors of acute myocardial infarction, 731

Propranolol
Effects of propranolol and nifedipine on exercise-induced attack in patients with variant angina: assessment by exercise thallium-201 myocardial scintigraphy with quantitative rotational tomography, 374

The renal, forearm, and hormonal responses to standing in the presence and absence of propranolol, 1061

Prostacyclin
Does prostacyclin enhance the selective pulmonary vasodilator effect of oxygen in children with congenital heart disease? 135

Prostaglandins
Evidence for a direct renal stimulating effect of prostaglandin $E_2$ on renin release in patients with congestive heart failure, 1203

Prosthetic grafts
Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombosis by urokinase or tissue-type plasminogen activator, I-21

Prosthetic valves
Five year follow-up after valve replacement with the St. Jude Medical valve in infants and children, I-110

Pulmonary regurgitation
Continuous-wave Doppler echocardiographic detection of pulmonary regurgitation and its application to noninvasive estimation of pulmonary artery pressure, 484

Q

QT interval
Polymorphous ventricular tachycardia: clinical characterization, therapy, and the QT interval, 340

Quinidine
Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of $d$-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

R

Race
Racial (black-white) comparisons of the relationship of levels of endogenous sex hormones to serum lipoproteins during male adolescence: the Bogalusa Heart Study, 1226

Rejection
Noninvasive monitoring of cardiac allograft rejection by intramyocardial electrogram recordings, III-72

Renin-angiotensin system
Preservation of glomerular filtration rate in human heart failure by activation of the renin-angiotensin system, 766

Reperfusion
Early detection of myocardial reperfusion by assay of plasma MM-creatinine kinase isofoms in dogs, 567

Reduction in experimental infarct size by recombinant human superoxide dismutase: insights into the pathophysiology of reperfusion injury, 1424

Sensitive detection of the effects of reperfusion on myocardium by ultrasonic tissue characterization with integrated backscatter, 389

Reperfusion injury
Reperfusion injury: laboratory artifact on clinical dilemma? 215

Retroperfusion
Preliminary experience with synchronized coronary sinus retroperfusion in humans, 381

Risk factors
Family history of heart attack: a modifiable risk factor? 239
Risk stratification
Risk stratification for 1 year survival based on characteristics identified in the early hours of acute myocardial infarction. The Western Washington Intracoronary Streptokinase Trial, 703

SPECT
Quantification of myocardial infarct size by thallium-201 single-photon emission computed tomography: experimental validation in the dog, 852

ST segment
ST segment response to acute coronary occlusion: coronary hemodynamic and angiographic determinants of direction of ST segment shift, 973

Scintigraphy
Iodine 123-phenylpentadecanoic acid myocardial scintigraphy: usefulness in the identification of myocardial ischemia, 1007
Scintigraphic quantification of myocardial necrosis in patients after intravenous injection of myosin-specific antibody, 501

Septal geometry
Septal geometry in the unloading living human heart, 463

Sex hormones
Racial (black-white) comparisons of the relationship of levels of endogenous sex hormones to serum lipoproteins during male adolescence: the Bogalusa Heart Study, 1226

Sinoatrial node
Modulated parasystole originating in the sinoatrial node, 945
d-Sotalol
Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of d-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

Special reports
Guidelines for clinical use of cardiac radionuclide imaging, December 1986, 1468A
Guidelines for exercise testing, 653A
Recommendations for use of laboratory studies for pediatric patients with suspected or proven heart disease, 443A
Recreational and occupational recommendations for young patients with heart disease, 1195A
Report of WHO/ISFC Task Force on Nomenclature of Coronary Arteriograms, 451A

Stenosis
Coronary dissection and total coronary occlusion associated with percutaneous transluminal coronary angioplasty: significance of initial angiographic morphology of coronary stenosis, 1371

Streptokinase
Assessment of fibrin degradation products during fibrinolytic therapy for acute myocardial infarction, 1027
Which patients benefit most from early thrombolytic therapy with intracoronary streptokinase? 1379

Stunned myocardium
Selective enhancement of function of stunned myocardium by increased flow, 843

Subendocardial infarction
The subendocardial border zone during acute ischemia of the rabbit heart: an electrophysiologic, metabolic, and morphologic correlative study, 1137

Superoxide dismutase
Reduction in experimental infarct size by recombinant human superoxide dismutase: insights into the pathophysiology of reperfusion injury, 1424

Supraventricular tachycardia
Ablation of cardiac tissues by an electrode catheter technique for treatment of ectopic supraventricular tachycardia in adults, 1044
High-frequency analysis of the surface electrocardiograms of patients with supraventricular tachycardia: accurate identification of atrial activation and determination of the mechanism of tachycardia, 1016
The preexcitation index: an aid in determining the mechanism of supraventricular tachycardia and localizing accessory pathways, 493

Surgery
Early results of emergency surgery after coronary angioplasty, III-26
The efficacy of blood versus crystalloid sinus cardioplegia during global myocardial ischemia, III-99
Evaluation of human coronary blood flow with an 80 channel, 20 MHz pulsed Doppler velocimeter and zero-cross and Fourier transform methods during cardiac surgery, III-53
The influence of surgery on the natural history of angiographically documented left ventricular aneurysm: the Coronary Artery Surgery Study, 110
Late postoperative ventricular function after blood and crystalloid cardioplegia, III-89
Long-term results in surgical treatment of children 4 years old or younger with coronary involvement due to Kawasaki disease, I-77
Regional myocardial protection by retrograde coronary sinus infusion of cardioplegic solution, III-16
Retrograde coronary sinus versus aortic root perfusion with cold cardioplegia: a randomized study of levels of cardiac enzymes in 40 patients, III-105
Surgery for Wolff-Parkinson-White syndrome: further experience with an epicardial approach, 525

Survival
Ten year survival after coronary artery bypass surgery for angina in patients aged 65 years and older, 509
Systemic vascular resistance
Systemic vascular resistance: an unreliable index of left ventricular afterload, 1114

T

Taussig-Bing heart
Intraventricular tunnel repair for Taussig-Bing heart and related cardiac anomalies, I-53

Thromboembolism
Antithrombotic therapy for acute myocardial infarction: mechanisms and prevention of deep venous, left ventricular, and coronary artery thromboembolism, III-1

Thrombolysis
Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21
Coronary thrombolysis with recombinant single-chain urokinase-type plasminogen activator in patients with acute myocardial infarction, 1066
Enhancement of thrombolysis with tissue-type plasminogen activator by pretreatment with heparin, 583
Synergism of thrombolytic agents in vivo, 838
Thrombolysis with recombinant human tissue-type plasminogen activator in patients with peripheral artery and bypass graft occlusions, I-15
Which patients benefit most from early thrombolytic therapy with intracoronary streptokinase? 1379

Thrombocytopenia
Prevention of myocardial platelet deposition and thromboxane release with dipyridamole, III-145

Tissue characterization
Sensitive detection of the effects of reperfusion on myocardium by ultrasonic tissue characterization with integrated backscatter, 389

Tissue-type plasminogen activator
Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21
Enhancement of thrombolysis with tissue-type plasminogen activator by pretreatment with heparin, 583
Synergism of thrombolytic agents in vivo, 838
Thrombolysis with recombinant human tissue-type plasminogen activator in patients with peripheral artery and bypass graft occlusions, I-15

Tomography
Precision measurements of right and left ventricular volume by cine computed tomography, 890
Quantification of myocardial infarct size by thallium-201 single-photon emission computed tomography: experimental validation in the dog, 852

Transposition of the great arteries
Up to 7 years of follow-up after two-stage anatomic correction of simple transposition of the great arteries, I-47
Transseptal electrode
Histologic changes and arrhythmogenicity after discharge through transseptal catheter electrode, 637

Tricuspid atresia
Left ventricular wall contracture and contractile function in childhood: normal values and comparison of Fontan versus palliation only in patients with tricuspid atresia, 1-61

Triggered activity
Characteristics of initiation and termination of catecholamine-induced triggered activity in atrial fibers of the coronary sinus, 1168

Ultrasonic backscatter
The use of frequency histograms of ultrasonic backscatter amplitudes for detection of atherosclerosis in vitro, 1093

Ultrasound
Intimal plus medial thickness of the arterial wall: a direct measurement with ultrasound imaging, 1,399

Urokinase
Beneficial effect of aspirin in maintaining the potency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21

Synergism of thrombolytic agents in vivo, 838

Urokinase-type plasminogen activator
Coronary thrombolysis with recombinant single-chain urokinase-type plasminogen activator in patients with acute myocardial infarction, 1066

Vagal stimulation
Effect of postganglionic vagal stimulation on the organization of atrioventricular nodal conduction in isolated rabbit heart tissue, 869

Valve replacement
Five year follow-up after valve replacement with the St. Jude Medical valve in infants and children, 1-110

Papillary-annular continuity and left ventricular systolic function after mitral valve replacement, 1-121

The effect of preservation of chordae tendineae in mitral valve replacement for postinfarction mitral regurgitation, I-116

Valvular heart disease
Mechanics of postextrasystolic potentiation in normal subjects and patients with valvular heart disease, 10

Validation of continuous-wave Doppler echocardiographic measurements of mitral and tricuspid prosthetic valve gradients: a simultaneous Doppler-catheter study, 786

Valvular regurgitation
Intraoperative echocardiography for the evaluation of valvular regurgitation: experience in 263 patients, 1-143

Valvuloplasty
Aortic valvuloplasty for acquired aortic stenosis, I-130

Balloon dilation of calcific aortic stenosis in elderly patients: postmortem, intraoperative, and percutaneous valvuloplasty studies, 119

Variant angina
Induction of coronary artery spasm by acetylcholine in patients with variant angina: possible role of the parasympathetic nervous system in the pathogenesis of coronary artery spasm, 955

Vascular resistance
Changes in systemic vascular resistance detected by the arterial resistermeter: preliminary report of a new method tested during percutaneous transluminal coronary angioplasty, 780

Vasoconstriction
Local coronary supersensitivity to diverse vasoconstrictive stimuli in patients with variant angina, 1255

Vasodilation
Vasodilatory behavior of skeletal muscle arterioles in patients with nonedematous chronic heart failure, 775

Vasodilators
The differential effects of positive inotropic and vasodilator therapy on diastolic properties in patients with congestive cardiomyopathy, 815

Vasomotor tone
Calcitonin gene–related peptide: a potent dilator of human epicardial coronary arteries, 1243

Ventricular aneurysm
The influence of surgery on the natural history of angiographically documented left ventricular aneurysm: the Coronary Artery Surgery Study, 110

Ventricular coupling
Ventricular coupling in constrictive pericarditis, 597

Ventricular function
Additive effects of dobutamine and amrinone on myocardial contractility and ventricular performance in patients with severe heart failure, 367

Advantages and applications of the centerline method for characterizing regional ventricular function, 293

Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675

Assessment of the end-systolic pressure-volume relationship in human beings with the use of a time-varying elastance model, 97

Effect of amrinone on right ventricular function: predominance of afterload reduction, 359

Effects of nifedipine on intrinsic myocardial stiffness in man, 126

The effect of vasoactive agents on the left ventricular end-systolic pressure-volume relation in closed-chest dogs, 1107

The effects of pressure-induced right ventricular hypertrophy on left ventricular diastolic properties and dynamic geometry in the conscious dog, 410

Improvement of left ventricular contractile function by exercise training in patients with coronary artery disease, 350

The influence of preload and heart rate on Doppler echocardiographic indexes of left ventricular performance: comparison with invasive indexes in an experimental preparation, 181

Left ventricular filling dynamics: influence of left ventricular relaxation and left atrial pressure, 187

Left ventricular wall stress and contractile function in childhood: normal values and comparison of Fontan versus palliation only in patients with tricuspid atresia, I-61

Measurement of regional wall motion from biplane contrast ventriculograms: a comparison of the 30 degree right anterior oblique and 60 degree left anterior oblique projections in patients with acute myocardial infarction, 796

Mechanisms of remote myocardial dysfunction during coronary artery occlusion in the presence of multivessel disease, 588

Myocardial relaxation and passive diastolic properties in man, 991

Noninvasive evaluation of left ventricular performance based on peak aortic blood acceleration measured with a continuous-wave Doppler velocity meter, 323

Papillary-annular continuity and left ventricular systolic function after mitral valve replacement, I-121

Phasic mitral blood flow and regional left ventricular dimensions: possible mechanism of active assist to ventricular filling, 901

Precision measurements of right and left ventricular volume by cine computed tomography, 890

Septal geometry in the unloaded living human heart, 463

Systemic vascular resistance: an unreliable index of left ventricular afterload, 1114

Ventricular hypertrophy
The effects of pressure-induced right ventricular hypertrophy on left ventricular diastolic properties and dynamic geometry in the conscious dog, 410

Ventricular interaction
Paradoxical and pseudoparadoxical interventricular septal motion in patients with right ventricular volume overload, 230

Ventricular remodeling
Left ventricular remodeling after myocardial infarction: a corollary to infarct expansion, 693

Ventricular sensory receptor
Impaired responsiveness of the ventricular sensory receptor in hypertensive patients with left ventricular hypertrophy, 980

Ventricular septal defect
Color Doppler detection of multiple ventricular septal defects, 1317
Ventricular septal rupture
Postinfarction ventricular septal rupture: the importance of location of infarction and right ventricular function in determining survival, 45

Ventricular tachycardia
Adenosine-sensitive ventricular tachycardia: evidence suggesting cyclic AMP-mediated triggered activity, 270
Amiodarone versus amiodarone and a type IA agent for treatment of patients with rapid ventricular tachycardia, 1037
Characterization of the spatial distribution of late ventricular potentials by body surface mapping in patients with ventricular tachycardia, 1323
The effects of doxorubicin on ventricular tachycardia, 881
Effects of incremental doses of procainamide on ventricular refractoriness, intraventricular conduction, and induction of ventricular tachycardia, 1355
The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518
Polymorphous ventricular tachycardia: clinical characterization, therapy, and the QT interval, 340
Quantitative analysis of myocardial infarct structure in patients with ventricular tachycardia, 1266
Resetting response patterns during sustained ventricular tachycardia: relationship to the excitable gap, 722
The use of ambulatory monitoring in the prognostic evaluation of patients with sustained ventricular tachycardia treated with amiodarone, 1054

Ventricular/vascular interaction
Ventricular/vascular interaction in patients with mild systemic hypertension and normal peripheral resistance, 455

Ventriculography
Measurement of regional wall motion from biplane contrast ventriculograms: a comparison of the 30 degree right anterior oblique and 60 degree left anterior oblique projections in patients with acute myocardial infarction, 796

Verapamil
Acute spinal cord ischemia: prevention of paraplegia with verapamil, I-5
Does verapamil improve left ventricular relaxation in patients with myocardial hypertrophy? 530

Volume overload
Paradoxical and pseudoparadoxical interventricular septal motion in patients with right ventricular volume overload, 230

W

Wall thickening
Direct measurement of inner and outer wall thickening dynamics with epicardial echocardiography, 164

Wolff-Parkinson-White syndrome
The role of initial minimum potentials on body surface maps in predicting the site of accessory pathways in patients with Wolff-Parkinson-White syndrome, 89
Surgery for Wolff-Parkinson-White syndrome: further experience with an epicardial approach, 525
