Circulation

Subscription Rates
Annual subscriptions accepted at any time. Subscription rates for Japan and Europe are available through respective exclusive agents. All orders for Japan must be sent to Nankodo Co., Ltd., 42-6 Hongo 3-chome, Bunkyo-ku, Tokyo 113, Japan. All orders for Europe must be sent to Harcourt Brace Jovanovich, Ltd., Foots Cray High Street, Sidcup, Kent DA14 5HP, England.

Individuals may subscribe to Circulation for their personal use at the following rates: $76 in the United States; $90 outside the United States, Japan, or Europe. Interns, residents, and medical students (United States, Canada, or Mexico only) are eligible for a reduced rate if payment is accompanied by a letter from the department chairman verifying post held and completion date. Special reduced rates are $38 in the United States, $45 in Canada and Mexico. Subscriptions for libraries, reading rooms, and other multiple-use institutions are available at special rates; contact the AHA for details. Remittances for subscriptions outside Japan and Europe must be made by check, draft, post office or express money order in U.S. dollars drawn on U.S. bank, payable to the American Heart Association with Circulation on the face of the check. Payment can also be made by VISA or MasterCard if account number, expiration date, name as it appears on card and signature are furnished. Issues will be mailed after payment is received. Prices are subject to change without notice. Single copy rates are available on request.

Editorial Correspondence
John Ross, Jr., M.D., Circulation Editor, 2223 Avenida de la Playa, Suite 203, La Jolla, CA 92037. Telephone (619) 454-9736, FAX (619) 454-0931.

Business Correspondence
Publishing Director, American Heart Association, 7320 Greenville Avenue, Dallas, TX 75231.

Second class postage paid at Dallas, Texas, and additional mailing offices. POST-MASTER: Send address changes to Circulation. American Heart Association, 7320 Greenville Avenue, Dallas, TX 75231.

The Customer Service Department should be advised of change of address 30 days before date of issue. Provide both old and new addresses. Telephone: (214) 706-1310. FAX: (214) 691-2704.

Advertising Correspondence

Advertising copy must be approved by a special committee of the American Heart Association. Advertising forms close 45 days before the first day of publication month. Advertising rates and page sizes are available on request.

Instructions to Authors
Information about manuscripts for Circulation, including format, submission, review, and editing, appear in each issue (see Table of Contents). The author bears the cost of color in illustrations, as well as the cost of any reprints.

Workshop VI: Drug Therapy
Participants: Richard J. Havel, MD, Chairman; Jean Davignon, MD; Carlos A. Dujovne, MD; Richard Gregg, MD; Donald B. Hunninghake, MD; Tatu Miettinen, MD; Urs Steinbrecher, MD; and Jonathan A. Tobert, MD, PhD
Seeding of Intravascular Stents With Genetically Engineered Endothelial Cells
David A. Dichek, MD, Richard F. Neville, MD, James A. Zwiebel, MD, Scott M. Freeman, MD, Martin B. Leon, MD, and W. French Anderson, MD

Comparison of Measures of Left Ventricular Contractile Performance Derived From Pressure-Volume Loops in Conscious Dogs
William C. Little, MD, Che-Ping Cheng, MD, PhD, Michael Mumma, MD, Yuichiro Igarashi, MD, Jakob Vinten-Johansen, PhD, and William E. Johnston, MD

Intracoronary Adenosine Administered After Reperfusion Limits Vascular Injury After Prolonged Ischemia in the Canine Model
David G. Babbitt, MD, Renu Virmani, MD, and Mervyn B. Forman, MD

Increased Adenosine Concentration in Blood From Ischemic Myocardium by AICA Riboside: Effects on Flow, Granulocytes, and Injury
Harry E. Gruber, Mike E. Hoffer, David R. McAllister, Paul K. Laikind, Thomas A. Lane, Geert W. Schmid-Schoenbein, and Robert L. Engler

Slow and Long-Lasting Modulation of Myocardial Repolarization Produced by Ectopic Activation in Isolated Rabbit Hearts: Evidence for Cardiac “Memory”
Angelika Costard-Jäckle, MD, Bettina Goetsch, Matthias Antz, and Michael R. Franz, MD

Action Potential Duration Alternans in Dog Purkinje and Ventricular Muscle Fibers: Further Evidence in Support of Two Different Mechanisms
Hirokazu Saitoh, MD, John C. Bailey, MD, and Borys Surawicz, MD

Singlet Oxygen–Induced Arrhythmias: Dose- and Light-Response Studies for Photoactivation of Rose Bengal in the Rat Heart
Yoshiaki Kusama, MD, Michèle Bernier, PhD, and David J. Hearse, PhD, DSc

Myocardial Glutathione Depletion Impairs Recovery After Short Periods of Ischemia
Alvin Blaustein, MD, Susan M. Deneko, PhD, Ruth I. Stolz, MD, Deborah Baxter, BSc, Nancy Healey, BSc, and Barry L. Fanburg, MD

Effects of Graded Reductions in Coronary Perfusion Pressure on the Diastolic Pressure-Segment Length Relation and the Rate of Isovolumic Relaxation in the Resting Conscious Dog
Eli R. Farhi, MD, PhD, John M. Canty Jr., MD, and Francis J. Klocke, MD
