Key References

Reversal of Coronary Heart Disease by Lipid-Lowering Therapy
Observations and Pathological Mechanisms

B. Greg Brown, MD, PhD; Vincent M.G. Maher, MD, MRCP I

The following list of key references has been compiled by experts in the field of coronary heart disease reversal through the use of lipid-lowering therapy.

Reviews

Primary Prevention Trials—Clinical: Drug and/or Diet Intervention

Secondary Prevention Trials—Clinical: Drug Plus Diet Intervention

**Angiographic Trials**

Kuo PT, Hayase K, Kostis JB, Moreyra AE. Use of combined diet and colesterol in long-term (7-7 1/2 years) treatment of patients with type II hyperlipoproteinemia. Circulation. 1979;59:199-211.

**Lipid and Lipoprotein Fractions and Atherosclerosis: Coronary Heart Disease and Its Reversal**

Chait A, Brazg RL, Tribble DL, Krauss RM. Susceptibility of small, dense, low-density lipoproteins to oxidative modification in subjects with the athero-

Quantitative Angiographic Methods

Experimental Pathology and Vascular Biology

Clarkson TB, Bond MG, Bullock BC, Marzetta CA. A study of atherosclerosis regression in Macaca mulatta. IV. Changes in coronary arteries from animals with atherosclerosis induced for 19 months and then regrasse for 24 or 48 months at plasma cholesterol concentrations of 300 or 200 mg/dl. Exp Med Pathol. 1981;34:345-368.

Rosenfeld ME, Tsukada T, Chait A, Bierman EL, Gown AM, Rose R. Fatty streak expansion and maturation in Watanabe heritable hyperlipemic and comparably hypercholesterolemic fat-fed rabbits. Arteriosclerosis. 1987;7:24-34.

Human Pathology and Vascular Biology

Nabel EG, Selwyn AP, Ganz P. Large coronary arteries in humans are responsive to changing blood flow: an endothelium-dependent mechanism that fails in patients with atherosclerosis [see comments]. J Am Coll Cardiol. 1990;16:349-356.

Lendon CL, Davies MJ, Born GV, Richardson PD. Atherosclerotic plaque caps are locally weakened when macrophages density is increased. Arteriosclerosis. 1991;87:87-90.
